1951 May	95,800	8,400	9,700	16,600	7,300	9,700	5,300	13,000	9,000	4,200	5,500	7,200
*1950 May	100,500	8,400	10,900	17,600	8,000	10,500	5,500	13,300	9,400	4,200	5,700	6,900
(b) New claims to injury benefit.												
Week ended:—												
June 12	13,600	2,100	2,200	1,600	1,400	1,400	400	1,000	800	400	500	1,900

\* See note 3.

Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.

(2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

(3) The weekly averages are usually for periods of four weeks, but the months are marked \* when the average is for periods of five weeks.

#### Daily Notes

Sunday—Cloudy to fair all day. Slight shower in afternoon; intermittent light rain early evening.

Monday—Overcast with fog and mist early; fair to cloudy rest of day. Slight rain in evening. Fresh SSW-S winds 12h.—1810. Dew in morning.

Tuesday—Cloudy early, with slight, moderate and heavy rain; fair rest of day. Slight intermittent rain early evening. Gusts more than 38 m.p.h.—14.25h., 15.10h., 15.25h. (SSW).

Wednesday—Cloudy all day. Gusts more than 38 m.p.h.—14h., 15h., 15.10h., 25 (SW).

Thursday—Cloudy all day. Slight rain in afternoon; fresh SSW winds 01h.—01.45h., 07.15h., 16.38h.

Friday—Cloudy early, becoming fair then fine later. Slight shower early.

Saturday—Fine in morning, becoming fair in afternoon; cloudy to fair in evening.

The reading of the barometer rose from 1009.3 mbs. at beginning of week to 1019.0 mbs. at 08h. on 11th, fell to 1012.0 mbs. at 13.15h. on 12th, rose to 1023.1 mbs. by 07.30h. on 16th, then fell to 1018.1 mbs. by 24h. on 16th.

#### Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1950. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S  
WEEKLY RETURN FOR  
ENGLAND AND WALES

BIRTHS AND DEATHS,  
INFECTIOUS DISEASES,  
WEATHER

WEEK ENDED

SATURDAY, 23<sup>th</sup> JUNE, 1951

*Crown Copyright Reserved.*

LONDON: HIS MAJESTY'S STATIONERY OFFICE

1951

*Ninepence net*

## NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The sickness and incapacity rates shown in Table V are based on the results of sample interviews carried out for the Registrar General by the Social Survey of the Central Office of Information. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table VI) are supplied by the Ministry of National Insurance. Meteorological data (Tables VII and VIII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946. i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and the other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

---

## NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published *on this page* immediately below this note as soon as available:—

- |                  |  |
|------------------|--|
| <b>Monthly</b>   | Deaths from smallpox—about the fourth week following the month.  |
| <b>Quarterly</b> | <p>(a) Numbers and rates of live births, stillbirths, <i>total</i> deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics <i>see</i> the Registrar General's Quarterly Return).</p> <p>(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.</p> |
| <b>Annual</b>    | <p>Numbers and rates of live births, stillbirths, <i>total</i> deaths, and deaths of infants under one year of age—about the third week in January.</p> <p>Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.</p>   |

**TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.**

(a) London.

(b) Great Towns in the aggregate.

(See notes on page 2).

*Note:—*The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

\* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate e.g., influenzal pneumonia.

¶ Change in boundary, 1st. April, 1951

**TABLE III.—Deaths (classified in accordance with the Abbreviated List\* and at different age periods) registered in the week ended 23rd June, 1951, with totals from the first week of the year to date.** } London.

\* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative  
the week ended 23rd June, 1951. } Areas and Port Health Districts.

(See notes on page 2).

Note:—Where no return has been received an asterisk \* is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

1951 May	95,800	8,400	9,700	16,600	7,300	9,700	5,300	13,000	9,000	4,200	5,500	7,700
*1950 May	100,500	8,400	10,900	17,600	8,000	10,500	5,500	13,300	9,400	4,200	5,700	6,500

(b) New claims to injury benefit.

Week ended:—												
June 19	13,200	2,100	2,100	1,600	1,300	1,300	400	1,000	800	300	500	1,100

\* See note 3.

Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.

(2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

(3) The weekly averages are usually for periods of four weeks, but the months are marked \* when the average is for periods of five weeks.

#### Daily Notes

Sunday—Fair all day. Fresh SW winds 08h.—18.55h. Dew in morning.

Monday—Fair in morning and evening; cloudy in afternoon. Slight showers afternoon and early evening; moderate rain 15.35h. Dew in morning.

Tuesday—Fine to fair until mid-morning, then cloudy; fine again in evening. Thunder mid-day (NW), distant 15.21h. Light and moderate showers during afternoon; heavy at 15.09h., 15.20h., 15.30h. Dew in morning.

Wednesday—Cloudy most of day, becoming fair in evening. Dew in morning.

Thursday—Generally fine in morning; cloudy for rest of day except for fair intervals in afternoon. Intermittent light rain late.

Friday—Generally cloudy, with a few fair periods late morning. Continuous light to moderate rain, heavy 02.45—55h. in early morning. Fog around 06h.

Saturday—Cloudy. Continuous light drizzle in morning, intermittent in afternoon.

The reading of the barometer fell from 1018.1 mbs. at beginning of week to 1014.7 mbs. at 14.30h. on 17th. rose to 1024.3 mbs. at 08.35h. on 20th, fell to 1008.5 mbs. by 24h. on 23rd.

#### Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1950. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

## NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The sickness and incapacity rates shown in Table V are based on the results of sample interviews carried out for the Registrar General by the Social Survey of the Central Office of Information. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table VI) are supplied by the Ministry of National Insurance. Meteorological data (Tables VII and VIII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and the other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

---

## NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available:—

- |                  |  |
|------------------|--|
| <b>Monthly</b>   | Deaths from smallpox—about the fourth week following the month.  |
| <b>Quarterly</b> | <p>(a) Numbers and rates of live births, stillbirths, <i>total</i> deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics <i>see</i> the Registrar General's Quarterly Return).</p> <p>(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.</p> |
| <b>Annual</b>    | <p>Numbers and rates of live births, stillbirths, <i>total</i> deaths, and deaths of infants under one year of age—about the third week in January.</p> <p>Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.</p>   |

**TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.**

(a) London.

(b) Great Towns in the aggregate.

(See notes on page 2).

*Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.*

\* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate e.g., influenzal pneumonia.

¶ Change in boundary, 1st. April, 1951

**TABLE III.—Deaths (classified in accordance with the Abbreviated List\* and at different age periods) registered in the week ended 30th June, 1951, with totals from the first week of the year to date.** } **London.**

\* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

**TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative  
the week ended 30th June, 1951. } Areas and Port Health Districts.**

(See notes on page 2).

*Note:—*Where no return has been received an asterisk \* is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

(b) New claims to injury benefit.

Week ended:—												
June 26	13,200	2,000	2,100	1,600	1,300	1,200	500	1,000	800	400	500	1,000

\* See note 3.

Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.

(2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

(3) The weekly averages are usually for periods of four weeks, but the months are marked \* when the average is for periods of five weeks.

TABLE VII.—Air Temperature and Rainfall in  
the week ended 30th June, 1951.

Certain Great Towns in England and  
Wales and four Scottish and Irish Towns.

#### Daily Notes

Sunday—Generally cloudy all day.

Monday—Cloudy most of day, except for fair periods around 06h. and 18h. Light showers in evening, and light to moderate rain late; heavy at 22.45h. Fresh W winds 17.10h.—18h., 19.50h.—20.05h., 20.30—40h. Dew in morning.

Tuesday—Cloudy. Light rain early; intermittent light rain in morning; continuous light to moderate rain in afternoon. Fresh W winds 09.10h.—13.40h., 15.55h.—17h., 17.20—50h.

Wednesday—Generally cloudy all day.

Thursday—Cloudy, becoming fair by mid-evening. Intermittent light drizzle in morning. Dew in evening.

Friday—Fair most of morning, becoming cloudy in afternoon; fair to fine in evening. Dew morning and evening.

Saturday—Fine in morning, becoming cloudy at 15h., then fine to fair in evening. Dew morning and evening.

The reading of the barometer fell from 1008.5 mbs. at beginning of week to 1006.6 mbs. at 16h. on 24th, then rose to 1029.1 mbs. at 07h. on 30th, and fell to 1028.0 mbs. by 24h. on 30th.

#### Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h, and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1950. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

## NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The sickness and incapacity rates shown in Table V are based on the results of sample interviews carried out for the Registrar General by the Social Survey of the Central Office of Information. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table VI) are supplied by the Ministry of National Insurance. Meteorological data (Tables VII and VIII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and the other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

## NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available:—

**Monthly** Deaths from smallpox—about the fourth week following the month.

**Quarterly** (a) Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

**Annual** Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under one year of age—about the third week in January.  
Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

## Smallpox.

There were no deaths from smallpox registered during the month of May.

## Acute Poliomyelitis.

Weekly notifications\* of acute poliomyelitis in 1951 compared with those in 1950, 1949, 1948 and 1947.

Week Ended	May 5	May 12	May 19	May 26	Jun 2	Jun 9	Jun 16	Jun 23	Jun 30	Jul 7	Jul 14	Jul 21	Jul 28	Aug 4	Aug 11	Aug 18	Aug 25	Sept 1	Sept 8	Sept 15	Sept 22	Sept 29

\* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate e.g., influenzal pneumonia.

¶ Change in boundary, 1st. April, 1951

**TABLE III.—Deaths (classified in accordance with the Abbreviated List\* and at different age periods) registered in the week ended 7th July, 1951, with totals from the first week of the year to date.** } London.

\* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

**TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative  
the week ended 7th July, 1951. } Areas and Port Health Districts.**

(See notes on page 2).

*Note:*—Where no return has been received an asterisk \* is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

\* See note 3.

Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.

(2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

(3) The weekly averages are usually for periods of four weeks, but the months are marked \* when the average is for periods of five weeks.

#### Daily Notes

Sunday—Fine until early afternoon; cloudy until mid-evening, then fine again. Dew morning and evening.  
Monday—Fine most of day, with cloudy period in early evening. Dew in morning.  
Tuesday—Fine in morning; fair during afternoon and early evening; fine again late.  
Wednesday—Fair early, then cloudy morning and afternoon; fair in evening. Slight rain and shower in morning.  
Fresh winds :—07.50h.—08.30h. (WSW), 09.25—35h. (WNW), 10.05h.—13.20h. (NNW—NNE).  
Thursday—Generally cloudy except for fair period in afternoon. Slight rain late.  
Friday—Cloudy to fair all day. Intermittent light rain early. Fresh WSW winds :—11.10—11.30h., 12.20h.—15.05h.  
Saturday—Fair early, then generally cloudy until early evening, then fair to fine.

The reading of the barometer fell from 1028.0 mbs. at beginning of week to 1013.7 mbs. at 08h. on 4th, then rose to 1022.4 mbs. at 10.00h. on 5th, then fell to 1014.7 mbs. by end of week.

#### Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1950. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

## NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The sickness and incapacity rates shown in Table V are based on the results of sample interviews carried out for the Registrar General by the Social Survey of the Central Office of Information. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table VI) are supplied by the Ministry of National Insurance. Meteorological data (Tables VII and VIII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and the other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

## ENGLAND AND WALES

BIRTHS AND DEATHS registered in the Quarter ended 30th June, 1951, with comparative figures for the Second Quarters of three earlier years. (The customary analysis will appear in the QUARTERLY RETURN in due course).

Second Quarter of:—	LIVE BIRTHS.		STILLBIRTHS.		DEATHS (including non-civilians).		DEATHS OF INFANTS UNDER 1 YEAR.	
	Number.	per 1,000 population.	Number.	per 1,000 total live & stillbirths	Number.	per 1,000 population.	Number.	per 1,000 related live births.
1951 .. ..	180,958	16.6	4,156	22.5	121,298	11.1	5,029	28.7
1950 .. ..	181,784	16.6	4,178	22.5	120,746	11.0	5,026	28.1
1949 .. ..	192,038	17.6	4,496	22.9	119,972	11.0	5,758	30.3
1938 .. ..	164,179	16.0	6,639	38.9	119,188	11.6	8,006	50.3

## Acute Poliomyelitis. England and Wales.

Weekly notifications\* of acute poliomyelitis in 1951 compared with those in 1950, 1949, 1948 and 1947.

\* Not corrected for revision of diagnosis.

**E 1.—Births, Deaths (distinguishing Deaths of infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.**

(a) London.

(b) Great Towns in the aggregate.

(See notes on page 2).

*Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.*

Week ended:—	May. 5	May. 12	May. 19	May. 26	June 2	June 9	June 16	June 23	June 30	July 7	July 14	Totals from 1st Week of year, in Great Towns ONLY

Dublin ...	200	?	80	7	-	-	-	10	-	-	1	-

\* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate e.g., influenzal pneumonia.

¶ Change in boundary, 1st. April, 1951

**TABLE III.—Deaths (classified in accordance with the Abbreviated List\* and at different age periods) registered in the week ended 14th July, 1951, with totals from the first week of the year to date.** } London.

(See notes on page 2).

\* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative  
the week ended 14th July, 1951. } Areas and Port Health Districts.

(See notes on page 2).

Note:—Where no return has been received an asterisk \* is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

		Northern	East and West Ridings	North Western	North Midland	Midland	Eastern	London and South Eastern		Southern	South Western	Wales
								London & Middx.	Remainder			
1	2	3	4	5	6	7	8	9	10	11	12	13

(a) New claims to sickness benefit.

Week ended:—												
July 10	85,100	7,300	9,300	14,800	6,800	9,100	4,400	11,000	7,600	3,700	4,800	6,400
July 3	86,200	7,500	9,700	14,900	6,800	9,300	4,700	10,800	7,600	3,700	4,700	6,500
June 26	86,300	7,600	9,700	14,600	6,800	9,400	4,500	11,000	7,700	3,700	4,800	6,500
June 19	92,000	8,400	10,100	16,000	7,200	9,900	4,900	11,600	8,100	3,900	5,100	6,800
Weekly Averages:—												
*1951 June	89,800	8,100	9,900	15,500	7,000	9,600	4,700	11,500	8,000	3,800	5,000	6,700
1950 June	96,100	8,200	10,400	16,100	7,600	10,100	5,200	12,800	9,000	4,200	5,500	6,900

(b) New claims to injury benefit.

Week ended:—												
July 10	13,100	1,900	2,100	1,500	1,400	1,200	500	900	900	400	600	1,800

\* See note 3.

Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.

(2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

(3) The weekly averages are usually for periods of four weeks, but the months are marked \* when the average is for periods of five weeks.

TABLE VII.—Air Temperature and Rainfall in  
the week ended 14th July, 1951.

Daily Notes

Sunday—Fair early, then generally cloudy rest of day. Moderate and light shower in afternoon.

Monday—Cloudy early, becoming fine to fair in morning, then cloudy rest of day. Light showers in afternoon. Periods with light to moderate rain from mid-evening. Fresh SSW—S winds :—11.55h.—16.40h., 17.55h.—19.10h., 20.00h.—20.30h.

Tuesday—Generally cloudy except for fair period in early afternoon. Intermittent light drizzle and shower in morning. Gusts more than 38 m.p.h.:—11.15—25, 45, 55h.—12.10h., 13.45h., 14.00—30h., 15.00, 10, 55h., 17.20h., 18.00—05, 45, 55h. 19.20h. (SW)

Wednesday—Cloudy in morning, fair in afternoon and early evening; cloudy again late. Light showers in morning at mid-day and in evening; heavy 19.45h. Light to moderate rain late. Gusts more than 38 m.p.h.:—13.20h., 14.30h. (SW).

Thursday—Cloudy most of day. Continuous light to moderate rain in afternoon and evening; heavy at 20.10h.—20.15h. Fresh SW-SSW winds :—09.30h.—10.35h., 11.20h.—13.20h., 13.50h., 15.50h.

Friday—Fair until mid-day, then generally cloudy in afternoon and early evening; fair again late. Dew in morning.

Saturday—Cloudy most of day except for fair period in morning; fair again late evening. Dew in morning.

The reading of the barometer fell from 1014.7 mbs. at beginning of week to 1005.0 mbs. at 15.40h. on 11th, and rose to 1020.4 mbs. at end of week.

Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1950. In reading column 7 it should be borne in mind that + indicates “higher” and — “lower” than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen’s Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

1951 No. 29

# GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S  
WEEKLY RETURN FOR  
ENGLAND AND WALES

# BIRTHS AND DEATHS, INFECTIOUS DISEASES, WEATHER

WEEK ENDED

SATURDAY, 21st JULY, 1951

*Crown Copyright Reserved.*

LONDON: HIS MAJESTY'S STATIONERY OFFICE

1951

*Ninepence net*

## NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The sickness and incapacity rates shown in Table V are based on the results of sample interviews carried out for the Registrar General by the Social Survey of the Central Office of Information. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table VI) are supplied by the Ministry of National Insurance. Meteorological data (Tables VII and VIII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and the other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

## NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available:—

- Monthly** Deaths from smallpox—about the fourth week following the month.
- Quarterly** (a) Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).  
(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.
- Annual** Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under one year of age—about the third week in January.  
Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

## Acute Poliomyelitis.

Weekly notifications\* of acute poliomyelitis in 1951 compared with those in 1950, 1949, 1948 and 1947.

\* Not corrected for revision of diagnosis.

**TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.**

(a) London.

(b) Great Towns in the aggregate.

(See notes on page 2).

*Note:—*The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

\* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate e.g., influenzal pneumonia.

¶ Change in boundary, 1st. April, 1951.

**TABLE III.—Deaths (classified in accordance with the Abbreviated List\* and at different age periods) registered in the week ended 21st July, 1951, with totals from the first week of the year to date.** } London.

\* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

**TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative  
the week ended 21st July, 1951. } Areas and Port Health Districts.**

(See notes on page 2).

*Note:*—Where no return has been received an asterisk \* is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

Week ended:—												
July 17	12,400	1,900	2,000	1,400	1,400	1,200	500	900	800	400	500	1,600

\* See note 3.

Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.

(2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

(3) The weekly averages are usually for periods of four weeks, but the months are marked \* when the average is for periods of five weeks.

#### Daily Notes

Sunday—Cloudy until mid-morning; fair to cloudy in afternoon; fair in evening. Dew in morning.

Monday—Fair to fine early; fair during morning; cloudy in afternoon, and fair to fine in evening. Dew morning and evening.

Tuesday—Fine early, becoming fair to cloudy in morning; cloudy period during afternoon, and fair in evening. Dew in morning.

Wednesday—Fine early, becoming fair, and then cloudy for rest of day. Dew in morning.

Thursday—Cloudy until late afternoon, then fair and fine late.

Friday—Fine early, becoming cloudy to fair most of day; cloudy in evening.

Saturday—Cloudy to fair early, becoming fine for rest of day. Dew in morning.

The reading of the barometer rose from 1020·4 mbs. at beginning of week to 1028·1 mbs. at 06.50h. on 17th; fell to 1020·8 mbs. at 18h. on 19th, rose to 1025·8 mbs. at 07.30h. on 21st, and fell to 1019·3 mbs. by 24h. on 21st.

#### Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1950. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

1951 No. 30

GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S  
WEEKLY RETURN FOR  
ENGLAND AND WALES

BIRTHS AND DEATHS,  
INFECTIOUS DISEASES,  
WEATHER

WEEK ENDED

SATURDAY, 28th JULY, 1951

## NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The sickness and incapacity rates shown in Table V are based on the results of sample interviews carried out for the Registrar General by the Social Survey of the Central Office of Information. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table VI) are supplied by the Ministry of National Insurance. Meteorological data (Tables VII and VIII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and the other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

#### Estimates of Births. England and Wales.

(a) Final estimate of live births to be expected in the quarter ending 30th September, 1951	172,000
(b) Provisional estimate of live births to be expected in the quarter ending 31st December, 1951	168,000

In the above estimates regard has been had to (1) sample returns of the number of special ration books issued to expectant mothers by the Ministry of Food, and (2) the recent trend of registered live births. The sample comprises some 200 Food Office areas containing about 25 per cent. of the population.

#### Acute Poliomyelitis. England and Wales.

Weekly notifications\* of acute poliomyelitis in 1951 compared with those in 1950, 1949, 1948 and 1947.

Week Ended	May 5	May 12	May 19	May 26	Jun 2	Jun 9	Jun 16	Jun 23	Jun 30	Jul 7	Jul 14	Jul 21	Jul 28	Aug 4	Aug 11	Aug 18	Aug 25	Sept 1	Sept 8	Sept 15	Sept 22	Sept 29

\* Not corrected for revision of diagnosis.

**TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.**

(a) London.

(b) Great Towns in the aggregate.

(See notes on page 2).

*Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.*

\* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate e.g., influenzal pneumonia.

¶ Change in boundary, 1st. April, 1951.

**TABLE III.—Deaths (classified in accordance with the Abbreviated List\* and at different age periods) registered in the week ended 28th July, 1951, with totals from the first week of the year to date.** } London.

(See notes on page 2).

\* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

**TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative  
the week ended 28th July, 1951. } Areas and Port Health Districts.**

(See notes on page 2).

*Note:*—Where no return has been received an asterisk \* is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

\* See note 3.

Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.

(2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

(3) The weekly averages are usually for periods of four weeks, but the months are marked \* when the average is for periods of five weeks.

#### Daily Notes

Sunday—Fair early, and for period around 09h.; otherwise cloudy. Thunderstorm early afternoon with heavy rain 13.15—30h., squall 13.15h. Light to moderate rain mid-evening; heavy 20.20—30h. Gusts more than 38 m.p.h.:—13.15—25h. (W—WNW).

Monday—Cloudy all day. Light to moderate rain in morning; heavy 07h. Continuous light to moderate drizzle late afternoon and early evening; continuous light to moderate rain mid-evening; then intermittent.

Tuesday—Generally cloudy, with short fair periods in morning and late evening.

Wednesday—Fair early, becoming cloudy morning and afternoon; fair again late. Dew in morning.

Thursday—Fair early, becoming cloudy morning and afternoon; fine again late. Dew in morning.

Friday—Fair early, then cloudy most of day. Intermittent light rain in evening. Dew in morning.

Saturday—Generally cloudy all day.

The reading of the barometer fell from 1019.3 mbs. at beginning of week to 1005.4 mbs. at 03.00h. on 23rd, rose to 1026.7 mbs. at 09.05h. on 25th, fell to 1019.8 mbs. by 16.05h. on 28th and rose to 1022.5 mbs. by end of week.

#### Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1950. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

## NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The sickness and incapacity rates shown in Table V are based on the results of sample interviews carried out for the Registrar General by the Social Survey of the Central Office of Information. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table VI) are supplied by the Ministry of National Insurance. Meteorological data (Tables VII and VIII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and the other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

## NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available:—

<b>Monthly</b>	Deaths from smallpox—about the fourth week following the month.																		
<b>Quarterly</b>	(a) Numbers and rates of live births, stillbirths, <i>total</i> deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).																		
	(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.																		
<b>Annual</b>	Numbers and rates of live births, stillbirths, <i>total</i> deaths, and deaths of infants under one year of age—about the third week in January. Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.																		

## Smallpox.

There were no deaths from smallpox registered during the month of June

## Acute Poliomyelitis.

Weekly notifications\* of acute poliomyelitis in 1951 compared with those in 1950, 1949, 1948 and 1947.

\* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate e.g., influenzal pneumonia.

¶ Change in boundary, 1st. April, 1951.

**TABLE III.—Deaths (classified in accordance with the Abbreviated List\* and at different age periods) registered in the week ended 4th August, 1951, with totals from the first week of the year to date.** } London.

(See notes on page 2).

\* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

**TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative  
the week ended 4th August, 1951. } Areas and Port Health Districts.**

(See notes on page 2).

*Note:*—Where no return has been received an asterisk \* is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

	Scarlet fever.		Whooping cough.		Diphtheria.		Measles, excluding rubella.		Acute pneumonia (primary or influenzal).		Cholera. \* See note 3.

Notes: (1) Broadly, the whole of the civilian working population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.

(2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

(3) The weekly averages are usually for periods of four weeks, but the months are marked \* when the average is for periods of five weeks.

#### Daily Notes

Sunday—Fair early, then generally cloudy, except for short fair periods in afternoon.

Monday—Cloudy early and late, otherwise fair most of day. Intermittent light rain in evening; moderate shower late. Dew in morning.

Tuesday—Cloudy. Heavy thunderstorm early morning; heavy rain 00.55h.—01.10h., squall 00.35—40h. Intermittent light rain in morning. Fresh SW winds 13-10—50h., 14.15—25h.

Wednesday—Cloudy early, and in early afternoon; otherwise fair.

Thursday—Fair most of day, but cloudy periods mid-morning and afternoon.

Friday—Fair most of day, except for cloudy periods at mid-day and intermittently in late afternoon. Fresh S—SSW winds 08.35h.—13.50h., 14.50h.—17h.

Saturday—Generally cloudy. Continuous light to moderate rain early; light drizzle most of morning, moderate at mid-day. Light showers early afternoon.

The reading of the barometer fell from 1022.5 mbs. at beginning of week to 1009.8 mbs. at 03.15h. on 31st, rose to 1019.4 mbs. at 10.15h. on 2nd, fell to 1010.0 mbs. at end of week.

#### Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1950. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

## NOTES

1. **General.**—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The sickness and incapacity rates shown in Table V are based on the results of sample interviews carried out for the Registrar General by the Social Survey of the Central Office of Information. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table VI) are supplied by the Ministry of National Insurance. Meteorological data (Tables VII and VIII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. **Definition of areas.**—"London"=administrative county of London; "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough; "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and the other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

## NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available:—

<b>Monthly</b>	Deaths from smallpox—about the fourth week following the month.																			
<b>Quarterly</b>	(a) Numbers and rates of live births, stillbirths, <i>total</i> deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics <i>see</i> the Registrar General's Quarterly Return).																			
	(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.																			
<b>Annual</b>	Numbers and rates of live births, stillbirths, <i>total</i> deaths, and deaths of infants under one year of age—about the third week in January. Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.																			

## Acute Poliomyelitis.

Weekly notifications\* of acute poliomyelitis in 1951 compared with those in 1950, 1949, 1948 and 1947.

\* Not corrected for revision of diagnosis.

**TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.**

(a) London.

(b) Great Towns in the aggregate.

(See notes on page 2).

*Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.*

\* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate e.g., influenzal pneumonia.

¶ Change in boundary, 1st. April, 1951.

TABLE III.—Deaths (classified in accordance with the Abbreviated List\* and at different age periods) registered in the week ended 11th August, 1951, } London.  
with totals from the first week of the year to date.

(See notes on page 2).

CAUSES OF DEATH		Deaths registered from 1st week of the year. 1951	Deaths registered during current week											
			ALL AGES.	Under 4 weeks	4 weeks—under 1 year.	1-4 years.	5-14 years.	15-24 years.	25-34 years.	35-44 years.	45-54 years.	55-64 years.	65-74 years.	75 years and over.

\* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

**TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative  
the week ended 11th August, 1951. } Areas and Port Health Districts.**

(See notes on page 2).

*Note:*—Where no return has been received an asterisk \* is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

\* See note 3.

Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.

(2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

(3) The weekly averages are usually for periods of four weeks, but the months are marked \* when the average is for periods of five weeks.

Daily Notes

Sunday—Cloudy most of day with short fair intervals at 06h. and in afternoon. Light showers in morning; intermittent light rain in evening. Fresh SSW—S winds 12.05—50, 13.25—14.25, 15.55—16.10, 16.40—17h. Dew in morning.

Monday—Cloudy all day. Continuous light to moderate rain most of day; intermittent for period during morning. Heavy at 12.20—40, 22h.

Tuesday—Cloudy most of day, with fair period in afternoon. Periods of continuous light to moderate rain early and in morning; light to moderate showers afternoon and evening; heavy 16.30—35h. Gust more than 38 m.p.h.—16.45 (WSW).

Wednesday—Cloudy early, becoming fair in morning; then cloudy but becoming fair again late.

Thursday—Fair early, then cloudy rest of day except for fair period at 18h. Light showers afternoon and evening; thunderstorm in afternoon, with light to moderate rain. Dew morning and evening.

Friday—Cloudy most of day, except for fair periods at 06h., and in evening. Intermittent light drizzle in morning.

Saturday—Fair early, then cloudy rest of day. Continuous light to moderate rain from 08.10h. until end of day; heavy at 15.05—10, 15.55—16.20h. Fresh SSW winds 11h.—11.50h., 12.15h.—19.50h., 21.20h.—23.10h.

The reading of the barometer fell from 1010.0 mbs. at beginning of week to 998.7 mbs. at 15.55h. on 8th. rose to 1014.3 mbs. at 10.30h. on 10th, then fell to 1000.5 mbs. by end of week.

Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1950. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

# GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S  
WEEKLY RETURN FOR  
ENGLAND AND WALES

# BIRTHS AND DEATHS, INFECTIOUS DISEASES, WEATHER

WEEK ENDED

SATURDAY, 18th AUGUST, 1951

*Crown Copyright Reserved.*

LONDON: HIS MAJESTY'S STATIONERY OFFICE

1951

*Ninepence net*

## NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The sickness and incapacity rates shown in Table V are based on the results of sample interviews carried out for the Registrar General by the Social Survey of the Central Office of Information. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table VI) are supplied by the Ministry of National Insurance. Meteorological data (Tables VII and VIII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and the other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

## NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available:—

<b>Monthly</b>	Deaths from smallpox—about the fourth week following the month.																			
<b>Quarterly</b>	(a) Numbers and rates of live births, stillbirths, <i>total</i> deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics <i>see</i> the Registrar General's Quarterly Return).																			
	(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.																			
<b>Annual</b>	Numbers and rates of live births, stillbirths, <i>total</i> deaths, and deaths of infants under one year of age—about the third week in January. Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.																			

## Acute Poliomyelitis.

Weekly notifications\* of acute poliomyelitis in 1951 compared with those in 1950, 1949, 1948 and 1947.

\* Not corrected for revision of diagnosis.

**TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.**

(a) London.

(b) Great Towns in the aggregate.

(See notes on page 2).

*Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.*

\* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate e.g., influenzal pneumonia.

¶ Change in boundary, 1st. April, 1951.

**TABLE III.—Deaths (classified in accordance with the Abbreviated List\* and at different age periods) registered in the week ended 18th August, 1951, with totals from the first week of the year to date.** } **London.**

(See notes on page 2).

CAUSES OF DEATH		Deaths registered from 1st week of the year. 1951	Deaths registered during current week												
			ALL AGES.	Under 4 weeks	4 weeks—under 1 year.	1-4 years.	5-14 years.	15-24 years.	25-34 years.	35-44 years.	45-54 years.	55-64 years.	65-74 years.	75 years and over.

BE49	Suicide ..	277	6	-	-	-	-	-	-	1	-	1	2	-	

\* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

**TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative  
the week ended 18th August, 1951. } Areas and Port Health Districts.**

(See notes on page 2).

*Note:*—Where no return has been received an asterisk \* is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

\* See note 3.

Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.

(2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

(3) The weekly averages are usually for periods of four weeks, but the months are marked \* when the average is for periods of five weeks.

#### Daily Notes

Sunday—Cloudy most of day, becoming fair late afternoon and evening. Light to moderate rain early. Moderate shower with squall in morning; light to moderate showers early afternoon; violent shower 13.13h. Gust more than 38 m.p.h. 13.05h. (W).

Monday—Fair most of day, except for cloudy periods around mid-day and early afternoon. Dew in evening.

Tuesday—Generally cloudy, except for fair period around 15h. Dew in morning.

Wednesday—Cloudy early, becoming fair in morning and early afternoon, then cloudy.

Thursday—Fair, becoming fine during morning; fair in early afternoon and evening; cloudy for a period in afternoon. Dew in morning.

Friday—Fair early and in late afternoon and evening; cloudy rest of day. Light to moderate rain in morning. Dew in morning.

Saturday—Fair in early morning and around mid-day; otherwise cloudy. Fresh SSW winds 13.00h.—18.10h. Dew in morning.

The reading of the barometer rose from 1000.5 mbs. at beginning of week to 1021.6 mbs. at 12.10h. on 16th, then fell to 1008.2 mbs. at end of week.

#### Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1950. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

1951 No. 34

# GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S  
WEEKLY RETURN FOR  
ENGLAND AND WALES

## BIRTHS AND DEATHS, INFECTIOUS DISEASES, WEATHER

WEEK ENDED

SATURDAY, 25th AUGUST, 1951

*Crown Copyright Reserved.*

LONDON: HIS MAJESTY'S STATIONERY OFFICE

1951

*Ninepence net*

## NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The sickness and incapacity rates shown in Table V are based on the results of sample interviews carried out for the Registrar General by the Social Survey of the Central Office of Information. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table VI) are supplied by the Ministry of National Insurance. Meteorological data (Tables VII and VIII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and the other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

## NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available:—

<b>Monthly</b>	Deaths from smallpox—about the fourth week following the month.																			
<b>Quarterly</b>	(a) Numbers and rates of live births, stillbirths, <i>total</i> deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).																			
	(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.																			
<b>Annual</b>	Numbers and rates of live births, stillbirths, <i>total</i> deaths, and deaths of infants under one year of age—about the third week in January. Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.																			

## Acute Poliomyelitis.

Weekly notifications\* of acute poliomyelitis in 1951 compared with those in 1950, 1949, 1948 and 1947.

\* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate e.g., influenzal pneumonia.

¶ Change in boundary, 1st. April, 1951.

**TABLE III.—Deaths (classified in accordance with the Abbreviated List\* and at different age periods) registered in the week ended 25th August, 1951, with totals from the first week of the year to date.** } **London.**

\* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the number is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

**TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative  
the week ended 25th August, 1951. } Areas and Port Health Districts.**

(See notes on page 2).

*Note*:—Where no return has been received an asterisk \* is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

\* See note 3.

Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.

(2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

(3) The weekly averages are usually for periods of four weeks, but the months are marked \* when the average is for periods of five weeks.

#### Daily Notes

Sunday—Cloudy, except for fair periods in morning and early afternoon. Continuous light to moderate rain early; heavy 02h., 02.55h.—03.25h. Light showers late afternoon and evening. Fresh SSW—W winds:—01.50h.—02.10h., 17.30—45h.

Monday—Cloudy early, then fair to fine by 06h.; fair morning and early afternoon, then cloudy. Light showers in afternoon; heavy at 16.45h.; violent at 17.05h., then light shower. Fresh SSW winds 15.30—40h., 16h.—16.30h. Dew in morning.

Tuesday—Cloudy early, becoming fair to fine by 06h.; fair in morning, then cloudy. Fresh SSW winds 14.30h.—16h., 16.35h.—17h., 18h.—18.15h. Dew in morning.

Wednesday—Cloudy, becoming fair afternoon and early evening, then fine. Continuous light to moderate rain early; heavy 01.55h. and 07.40h.; continuous light drizzle in morning.

Thursday—Fair early and during morning; cloudy afternoon and early evening becoming fair to fine by mid-evening. Dew in morning.

Friday—Fair early, then cloudy rest of day. Intermittent light rain morning and afternoon; slight shower in morning; light to moderate rain in evening. Fresh SW—WSW winds 09.20h.—13.50h., 16.30h.—17.20h.

Saturday—Generally cloudy. Intermittent light rain in evening. Fresh SWS winds 12.45h.—19.20h., 20.15h.—24h.

The reading of the barometer rose from 1008.2 mbs. at beginning of week to 1022.4 mbs. at 08.00h. on 21st, fell to 1017.4 mbs. at 13.30h. on 22nd, rose to 1023.5 mbs. at 0700h. on 23rd, then fell to 1003.3 mbs. at end of week.

#### Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1950. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

## NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The sickness and incapacity rates shown in Table V are based on the results of sample interviews carried out for the Registrar General by the Social Survey of the Central Office of Information. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table VI) are supplied by the Ministry of National Insurance. Meteorological data (Tables VII and VIII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are included.

4. Births and deaths for Greater London, London and the other Great Towns are those registered in the area and have not been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

## NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available:—

<b>Monthly</b>	Deaths from smallpox—about the fourth week following the month.
<b>Quarterly</b>	(a) Numbers and rates of live births, stillbirths, total deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).
	(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.
<b>Annual</b>	Numbers and rates of live births, stillbirths, total deaths, and deaths of infants under one year of age—about the third week in January. Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

## Smallpox.

There were no deaths from smallpox registered during the month of July.

## Acute Poliomyelitis.

Weekly notifications\* of acute poliomyelitis in 1951 compared with those in 1950, 1949, 1948 and 1947.

\* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate e.g., influenzal pneumonia.

¶ Change in boundary, 1st. April, 1951.

**TABLE III.—Deaths (classified in accordance with the Abbreviated List\* and at different age periods) registered in the week ended 1st September, 1951, with totals from the first week of the year to date.** } London.

\* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative  
the week ended 1st September, 1951. } Areas and Port Health Districts.

(See notes on page 2).

Note:—Where no return has been received an asterisk \* is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

Weekly Averages:—												
1951 July	82,700	7,100	9,100	14,700	6,600	8,500	4,200	10,600	7,400	3,600	4,700	6,200
*1950 July	85,000	7,300	9,200	14,800	6,800	8,700	4,500	11,100	7,800	3,800	4,900	6,200

(b) New claims to injury benefit.

Week ended:—												
Aug. 28	12,900	2,100	2,000	1,600	1,400	1,100	500	900	800	400	500	1,700

\* See note 3.

Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.

(2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

(3) The weekly averages are usually for periods of four weeks, but the months are marked \* when the average is for periods of five weeks.

#### Daily Notes

Sunday—Cloudy most of day except for fair period around 18h. Continuous light to moderate rain early; heavy 01.20—25h., 01.30h., 02.15h.—03.30h. Light to moderate showers morning and early afternoon; heavy 07.40—45h., 12.30—35h. Light to moderate rain late evening; heavy 23.25h., 23.50h.—24h. Gusts more than 38 m.p.h.:—15.50h., 16.05h., 16.20h. (SW).

Monday—Generally cloudy. Light to moderate rain early; heavy 00h.—00.05h. Light to moderate showers morning and afternoon; heavy 14.35h. Light to moderate rain late evening. Gusts more than 38 m.p.h.:—12.45h. (SW); 14.45h. (WSW); 16.20—25h. (SW).

Tuesday—Cloudy. Intermittent light rain and drizzle in morning; continuous light to moderate rain in afternoon. Intermittent light drizzle in evening. Gust more than 38 m.p.h.:—13.10h. (SSW).

Wednesday—Cloudy early, and in afternoon and early evening; otherwise fair. Light shower early morning. Fresh SSW—SW winds 01.05h.—17h.

Thursday—Fair early and in late afternoon and evening; otherwise cloudy. Intermittent light rain in morning; continuous light to moderate at mid-day; heavy at 12h. Moderate shower in afternoon; violent at 15.10h. Light shower in evening.

Friday—Fair early then generally cloudy, becoming fair to fine late. Light to moderate showers early; thunder mid-day (NW); heavy showers 11.55h. and 14.15h.; light showers in afternoon. Fresh SW winds 13.10—35h.

Saturday—Fine early, becoming fair to cloudy by mid-day; continuous light to moderate rain afternoon and early evening; heavy at 18.30h.; fair again late. Dew morning and evening.

The reading of the barometer fell from 1003.3 mbs. at beginning of week to 996.9 mbs. at 03.00h. on 28th, rose to 1012.0 mbs. by 24h. on 31st, then fell to 1003.8 mbs. by 19.50h. on 1st and rose to 1006.1 mbs. at 24h. on 1st.

#### Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

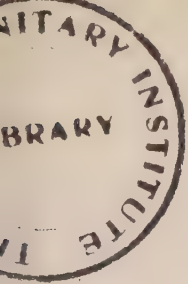

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1950. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

## NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The sickness and incapacity rates shown in Table V are based on the results of sample interviews carried out for the Registrar General by the Social Survey of the Central Office of Information. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table VI) are supplied by the Ministry of National Insurance. Meteorological data (Tables VII and VIII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and the other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

## NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available:—

<b>Monthly</b>	Deaths from smallpox—about the fourth week following the month.																			
<b>Quarterly</b>	(a) Numbers and rates of live births, stillbirths, <i>total</i> deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics <i>see</i> the Registrar General's Quarterly Return).																			
	(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.																			
<b>Annual</b>	Numbers and rates of live births, stillbirths, <i>total</i> deaths, and deaths of infants under one year of age—about the third week in January. Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.																			

## Acute Poliomyelitis.

Weekly notifications\* of acute poliomyelitis in 1951 compared with those in 1950, 1949, 1948 and 1947.

Week Ended	May 5	May 12	May 19	May 26	Jun 2	Jun 9	Jun 16	Jun 23	Jun 30	Jul 7	Jul 14	Jul 21	Jul 28	Aug 4	Aug 11	Aug 18	Aug 25	Sept 1	Sept 8	Sept 15	Sept 22	Sept 29

\* Not corrected for revision of diagnosis.

**TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.**

(a) London.

(b) Great Towns in the aggregate.

(See notes on page 2).

*Note*.—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

\* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate e.g., influenzal pneumonia.

¶ Change in boundary, 1st. April, 1951.

**TABLE III.—Deaths (classified in accordance with the Abbreviated List\* and at different age periods) registered in the week ended 8th September, 1951, with totals from the first week of the year to date.** } **London.**

(See notes on page 2).

\* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative  
the week ended 8th September, 1951. } Areas and Port Health Districts.

(See notes on page 2).

Note:—Where no return has been received an asterisk \* is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the “Others” column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

\* See note 3.

Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.

(2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

(3) The weekly averages are usually for periods of four weeks, but the months are marked \* when the average is for periods of five weeks.

#### Daily Notes

Sunday—Fair, becoming cloudy during morning, then fair to fine late. Dew in morning.

Monday—Fine to fair becoming cloudy by mid-day; intermittent slight rain late afternoon; moderate in evening becoming slight and intermittent late. Fresh winds 12.45h.—17.50h. (SW), 22.20h.—24h. (S). Dew in morning.

Tuesday—Cloudy with slight to intermittent rain early; fair during morning, becoming cloudy by afternoon with intermittent rain early evening. Fresh winds 0.0h.—0.1h. (SW), 09.30h.—17.30h. (SW). Dew in morning.

Wednesday—Cloudy all day, with slight showers in evening.

Thursday—Cloudy to fair early; cloudy rest of day. Dew in morning.

Friday—Cloudy all day; moderate rain early; slight to intermittent in morning.

Saturday—Cloudy early, becoming fair by mid-day and fine by evening. Fresh winds 09.15h.—14h. (E), 18.30h.—21h. (EN).

The reading of the barometer rose from 1006.1 mbs. at beginning of week to 1021.3 mbs. at 09.00 on 5th; fell to 1018.8 mbs. at 04.00h. on 6th, rose to 1023.3 mbs. at 09.50h. on 7th then fell to 1018.5 mbs. at end of week.

#### Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1950. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

## NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The sickness and incapacity rates shown in Table V are based on the results of sample interviews carried out for the Registrar General by the Social Survey of the Central Office of Information. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table VI) are supplied by the Ministry of National Insurance. Meteorological data (Tables VII and VIII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are included.

4. Births and deaths for Greater London, London and the other Great Towns are those registered in the area and have not been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

## NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available:—

<b>Monthly</b>	Deaths from smallpox—about the fourth week following the month.																			
<b>Quarterly</b>	(a) Numbers and rates of live births, stillbirths, total deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).																			
	(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.																			
<b>Annual</b>	Numbers and rates of live births, stillbirths, total deaths, and deaths of infants under one year of age—about the third week in January. Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.																			

## Acute Poliomyelitis.

Weekly notifications\* of acute poliomyelitis in 1951 compared with those in 1950, 1949, 1948 and 1947.

\* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate e.g., influenzal pneumonia.

¶ Change in boundary, 1st. April, 1951.

**TABLE III.—Deaths (classified in accordance with the Abbreviated List\* and at different age periods) registered in the week ended 15th September, 1951, with totals from the first week of the year to date.** } London.

(See notes on page 2).

\* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

**TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative  
the week ended 15th September, 1951. } Areas and Port Health Districts.**

(See notes on page 2).

*Note:*—Where no return has been received an asterisk \* is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

	Scarlet fever.		Whooping cough.		Diphtheria.		Measles, excluding rubella.		Acute pneumonia (primary or influenzal).		Cholera. \* See note 3.

Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.

(2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

(3) The weekly averages are usually for periods of four weeks, but the months are marked \* when the average is for periods of five weeks.

#### Daily Notes

Sunday—Fair early; cloudy rest of day.

Monday—Overcast with fog early, becoming cloudy in morning and afternoon; fair late, with dew and ground fog in patches.

Tuesday—Fair to cloudy early, becoming overcast with fog, then cloudy during morning and fair to cloudy rest of day. Slight shower late evening.

Wednesday—Cloudy all day, with rain early; heavy at 06.50h.—07h., with thunder. Lunar halo during evening.

Thursday—Cloudy during day, becoming fair to fine late. Slight showers during morning, and one in early evening. Gusts more than 38 m.p.h.:—13h.—17h. (SW). Dew in morning.

Friday—Fine early, becoming cloudy by mid-day; fair during rest of day. Dew in morning.

Saturday—Fair early, becoming cloudy during day, and fair to fine late. Light to moderate rain in morning; heavy at 08.30, 50, 55h., becoming light to intermittent drizzle by afternoon. Fresh S-SSW winds 00.30h.—14h. Dew in evening.

The reading of the barometer fell from 1018.5 mbs. at beginning of week to 999.1 mbs. at 12.55h. on 13th, rose to 1016.1 mbs. at 20.00h. on 14th, then fell to 1006.5 mbs. at 13.25h. on 15th, and rose to 1020.4 mbs. at 24h. on 15th.

#### Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1950. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

## NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The sickness and incapacity rates shown in Table V are based on the results of sample interviews carried out for the Registrar General by the Social Survey of the Central Office of Information. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table VI) are supplied by the Ministry of National Insurance. Meteorological data (Tables VII and VIII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are included.

4. Births and deaths for Greater London, London and the other Great Towns are those registered in the area and have not been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

## NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available :—

- Monthly** Deaths from smallpox—about the fourth week following the month.
- Quarterly** (a) Numbers and rates of live births, stillbirths, total deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).  
(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.
- Annual** Numbers and rates of live births, stillbirths, total deaths, and deaths of infants under one year of age—about the third week in January.  
Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

## Acute Poliomyelitis

Weekly notifications\* of acute poliomyelitis in 1951 compared with those in 1950, 1949, 1948, and 1947.

Week Ended	May 5	May 12	May 19	May 26	Jun 2	Jun 9	Jun 16	Jun 23	Jun 30	Jul 7	Jul 14	Jul 21	Jul 28	Aug 4	Aug 11	Aug 18	Aug 25	Sept 1	Sept 8	Sept 15	Sept 22	Sept 29

\* Not corrected for revision of diagnosis.

**TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.**

(a) London.

(b) Great Towns in the aggregate.

(See notes on page 2).

*Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.*

\* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate e.g., influenzal pneumonia.

¶ Change in boundary, 1st. April, 1951.

**TABLE III.—Deaths (classified in accordance with the Abbreviated List\* and at different age periods) registered in the week ended 22nd September, 1951, with totals from the first week of the year to date.** } **London.**

\* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

**TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative  
the week ended 22nd September, 1951. } Areas and Port Health Districts.**

(See notes on page 2).

*Note:*—Where no return has been received an asterisk \* is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

	Scarlet fever.		Whooping cough.		Diphtheria.		Measles, excluding rubella.		Acute pneumonia (primary or influenza).		Cholera.		Plague.		Meningococcal infection		Paralytic		Non-paralytic		Infective		Post Infectious		Typhus fever.		Relapsing fever.		Continued fever. (London only).		Dysentery.		Ophthalmia neonatorum.		Puerperal pyrexia and Puerperal fever.		Smallpox.		Paratyphoid fever.		Typhoid fever.		Food poisoning

\* See note 3.

Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.

(2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

(3) The weekly averages are usually for periods of four weeks, but the months are marked \* when the average is for periods of five weeks.

#### Daily Notes

Sunday—Fine to fair early, and during morning, then cloudy. Continuous light to moderate rain afternoon and evening; intermittent light rain late. Dew morning and evening.

Monday—Cloudy early and around mid-day; fair in morning and afternoon, becoming fine by 15h. Fog and mist around 06h. Dew morning and evening.

Tuesday—Fair early, then cloudy all day. Dew in morning.

Wednesday—Cloudy most of day except for fair to fine period from 07h.—08.30h. and fair intervals in afternoon; fair by evening with mist, and shallow fog at 21.15h. Dew in evening.

Thursday—Fair early and late, otherwise generally cloudy. Fog in early morning; thick 05.15—45h. Solar halo during early afternoon.

Friday—Fair early; cloudy to fair until mid-day, then fine. Dew in morning.

Saturday—Fine to fair early, then generally cloudy. Fog and dew early. Solar halo during most of morning and afternoon.

The reading of the barometer rose from 1020.4 mbs. at beginning of week to 1024.9 mbs. at 13h. on 17th; fell to 1020.5 mbs. at 17.30h. on 18th; rose to 1028.3 mbs. at 10h. on 20th, and then fell to 1006.1 mbs. at end of week.

#### Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1950. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

## NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The sickness and incapacity rates shown in Table V are based on the results of sample interviews carried out for the Registrar General by the Social Survey of the Central Office of Information. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table VI) are supplied by the Ministry of National Insurance. Meteorological data (Tables VII and VIII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are included.

4. Births and deaths for Greater London, London and the other Great Towns are those registered in the area and have not been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

## Smallpox. England and Wales.

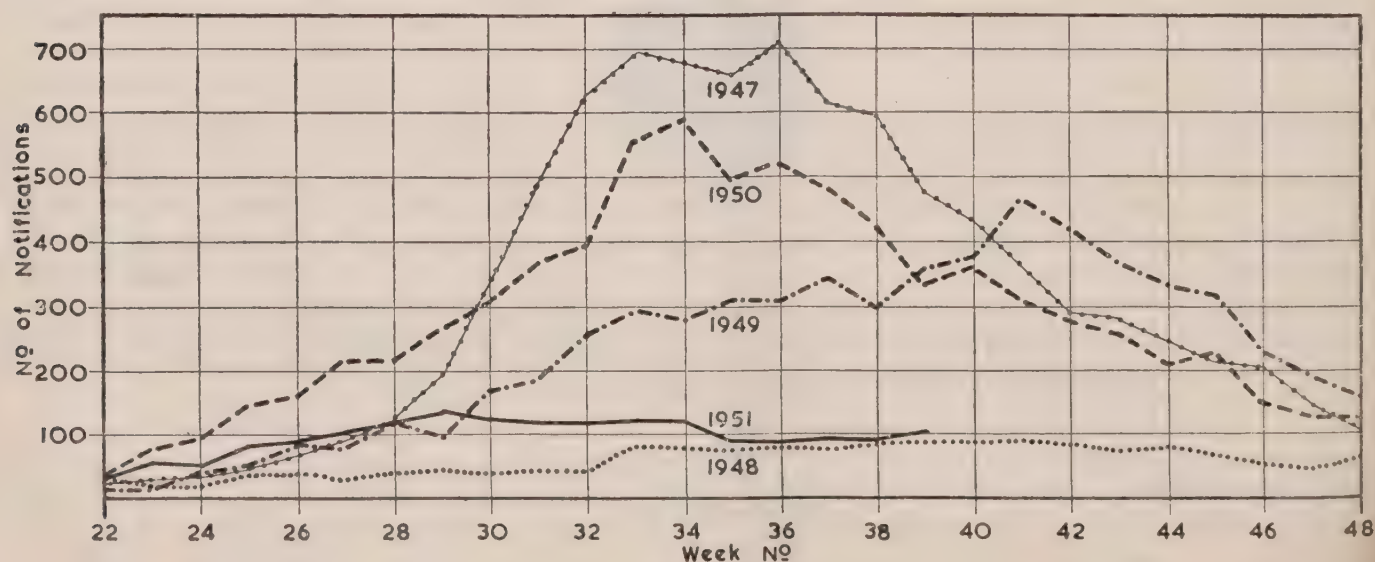

There were no deaths from smallpox registered during the month of August.

## Acute Poliomyelitis. England and Wales.

Weekly notifications\* of acute poliomyelitis in 1951 compared with those in 1950, 1949, 1948, and 1947.

\* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate e.g., influenzal pneumonia.

¶ Change in boundary, 1st. April, 1951.

**TABLE III.—Deaths (classified in accordance with the Abbreviated List\* and at different age periods) registered in the week ended 29th September, 1951, with totals from the first week of the year to date.** } London.

(See notes on page 2).

\* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

**TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative  
the week ended 29th September, 1951. } Areas and Port Health Districts.**

(See notes on page 2).

*Note:*—Where no return has been received an asterisk \* is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

Sept. 25	14,100	2,200	2,300	1,700	1,400	1,200	600	1,100	900	400	600	1,000

\* See note 3.

Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.

(2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

(3) The weekly averages are usually for periods of four weeks, but the months are marked \* when the average is for periods of five weeks.

#### Daily Notes

Sunday—Cloudy with continuous light rain and drizzle early; fair to fine by evening. Fresh winds 10.30—50h. (SW) 14.30h.—17.50h. (SSW).

Monday—Fair early and late, otherwise generally cloudy. Light shower in late afternoon. Gusts more than 38 m.p.h. 10.10, 40, 45, 55h.—11.10h., 12.00, 55h., 13.50h.—14.00h., 14.05, 35, 40h. (SSW).

Tuesday—Fair early, then cloudy most of day. Intermittent light rain in afternoon, becoming continuous light to moderate late afternoon and evening; heavy 18h. and 18.20h. Fresh S—SSW winds:—0.0h.—01.40h., 0.5h.—16.30h., 18.30h.—19h.,

Wednesday—Cloudy early, fair to fine in morning; cloudy at mid-day and in afternoon, then fair in evening. Continuous light rain early, becoming intermittent. Light shower at mid-day.

Thursday—Cloudy. Intermittent rain and drizzle in morning, becoming continuous light to moderate by afternoon until end of day; heavy 13.05h., 17.25h., 55h., 18.10h. Fresh SSW winds 11.20h.—13h., 13.50h.—16.30h.

Friday—Cloudy early; fair in morning, cloudy by 15h., then fair to fine rest of day. Continuous light to moderate rain early, heavy 00.40h. Light to moderate showers in afternoon; mist and dew in evening.

Saturday—Fine at first, then overcast with fog until mid-morning, then fine. Shallow fog early evening, becoming thick by 21.15h.

The reading of the barometer fell from 1006.1 mbs. at beginning of week to 1000.4 mbs. at 18.15h. on 25th, rose to 1012.8 mbs. by 21.50h. on 26th, fell to 1005.0 mbs. at 01.30h. on 28th, then rose to 1021.5 mbs. at end of week.

#### Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1950. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

THE REGISTRAR GENERAL'S  
WEEKLY RETURN FOR  
ENGLAND AND WALES

# BIRTHS AND DEATHS, INFECTIOUS DISEASES, WEATHER

WEEK ENDED

SATURDAY, 6th OCTOBER, 1951

*Crown Copyright Reserved.*

LONDON: HIS MAJESTY'S STATIONERY OFFICE

1951

*Ninepence net*

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The sickness and incapacity rates shown in Table V are based on the results of sample interviews carried out for the Registrar General by the Social Survey of the Central Office of Information. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table VI) are supplied by the Ministry of National Insurance. Meteorological data (Tables VII and VIII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are included.

4. Births and deaths for Greater London, London and the other Great Towns are those registered in the area and have not been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available :—

- MonthlyDeaths from smallpox—about the fourth week following the month.
- Quarterly(a) Numbers and rates of live births, stillbirths, total deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).  
(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.
- AnnualNumbers and rates of live births, stillbirths, total deaths, and deaths of infants under one year of age—about the third week in January.  
Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

Acute Poliomyelitis

Weekly notifications\* of acute poliomyelitis in 1951 compared with those in 1950, 1949, 1948, and 1947.

\* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate e.g., influenzal pneumonia.

¶ Change in boundary, 1st. October, 1951.

**TABLE III.—Deaths (classified in accordance with the Abbreviated List\* and at different age periods) registered in the week ended 6th October, 1951, with totals from the first week of the year to date.** } London.

\* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

**TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative  
the week ended 6th October, 1951. } Areas and Port Health Districts.**

(See notes on page 2).

*Note:*—Where no return has been received an asterisk \* is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

\* See note 3.

Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.

(2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

(3) The weekly averages are usually for periods of four weeks, but the months are marked \* when the average is for periods of five weeks.

#### Daily Notes

Sunday—Overcast with fog until mid-morning; thick 00h.—10h., becoming cloudy by noon, and for rest of day except for fair period in afternoon. Dew in morning and mist in evening.

Monday—Cloudy all day. Dew in morning, and light to moderate drizzle in late evening.

Tuesday—Cloudy all day.

Wednesday—Cloudy all day with mist in evening.

Thursday—Generally cloudy, but with fair periods at 09h. and in late evening. Mist and dew in morning, and fog by late evening.

Friday—Fair early and in late evening; otherwise cloudy. Mist and dew in morning, and with fog in evening.

Saturday—Fair, becoming cloudy by mid-day, then fair, and fine in evening. Dew morning and evening; shallow fog in patches late.

The reading of the barometer fell from 1021.5 mbs. at beginning of week to 1015.6 mbs. at 13.40h. on 1st, rose to 1026.6 mbs. at 10.30h. on 3rd, fell to 1020.4 mbs. by 15.00h. on 6th, then rose to 1021.3 mbs. by end of week.

#### Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1950. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

1951 No. 41

# GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S  
WEEKLY RETURN FOR  
ENGLAND AND WALES

## BIRTHS AND DEATHS, INFECTIOUS DISEASES, WEATHER

WEEK ENDED

SATURDAY, 13th OCTOBER, 1951

*Crown Copyright Reserved.*

LONDON: HIS MAJESTY'S STATIONERY OFFICE

1951

*Ninepence net*

## NOTES

1. General.—**The figures in this Return are provisional.** Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The sickness and incapacity rates shown in Table V are based on the results of sample interviews carried out for the Registrar General by the Social Survey of the Central Office of Information. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table VI) are supplied by the Ministry of National Insurance. Meteorological data (Tables VII and VIII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and the other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

## ENGLAND AND WALES

BIRTHS AND DEATHS registered in the Quarter ended 30th September, 1951, with comparative figures for the Third Quarters of three earlier years. (The customary analysis will appear in the QUARTERLY RETURN in due course).

Third Quarter of:—	LIVE BIRTHS.		STILLBIRTHS.		DEATHS (including non-civilians).		DEATHS OF INFANTS UNDER 1 YEAR.	
	Number.	per 1,000 population.	Number.	per 1,000 total live & stillbirths	Number.	per 1,000 population.	Number.	per 1,000 related live births.
1951 .. ..	168,028	15.2	3,727	21.7	100,090	9.1	3,998	23.5
1950 .. ..	170,087	15.4	3,919	22.5	102,867	9.3	4,176	24.2
1949 .. ..	183,221	16.6	4,118	22.0	101,190	9.2	4,915	26.5

\* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List\* and at different age periods) registered in the week ended 13th October, 1951, with totals from the first week of the year to date. } London.

\* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

TABLE IV.—Notification of Infectious Diseases in  
the week ended 13th October, 1951.

England and Wales, Administrative  
Areas and Port Health Districts.

(See notes on page 2).

Note:—Where no return has been received an asterisk \* is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

	Scarlet fever.	Whooping cough.	Diphtheria.	Measles, excluding rubella.	Acute pneumonia (primary or influenzal).	A	B	Meningococcal infection	D	Paralytic E	Acute polio-myelitis EF	F	Infective G	Acute enceph-alitis GK	H	I	J	L	M	N	C	O	P	R	S
						Cholera.	Plague.			Non-paralytic	Post Infectious K				Typhus fever.	Relapsing fever.	Continued fever. (London only).	Dysentery.	Ophthalmia neonatorum.	Puerperal pyrexia and Puerperal fever.	Smallpox.	Paratyphoid fever.	Typhoid fever.	Food poisoning

\* See note 3.

Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.

(2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

(3) The weekly averages are usually for periods of four weeks, but the months are marked \* when the average is for periods of five weeks.

#### Daily Notes

Sunday—Fine early, becoming overcast with fog; thick 05h.—08.30h.; fine again by 09h.; fair during afternoon and fine in evening, with mist late.

Monday—Fine early, becoming overcast with fog, thick 04h.—09.45h.; fine by 10h. for rest of day. Dew with mist and fog again late.

Tuesday—Fine early, becoming overcast with fog, thick 05h.—08.05h.; fine by 08h. for rest of day.

Wednesday—Fine to fair early; cloudy morning and late evening; fair in afternoon and early evening. Dew morning and evening; mist and fog late.

Thursday—Cloudy early, becoming overcast with fog, thick 02.30h.—07.30h.; fine by 09h. for most of day except for fair periods in afternoon. Haze in evening, becoming mist late. Frost in morning.

Friday—Fine all day. Fog in morning, thick 05.30h.—06.15h. Frost in morning and haze in evening, becoming mist late.

Saturday—Fair early, then cloudy rest of day. Continuous light to moderate rain and drizzle in morning; mist in evening.

The reading of the barometer rose from 1021.3 mbs. at beginning of week to 1024.6 mbs. at 20.30h. on 8th, fell to 1011.4 mbs. at 03.30h. on 13th, and rose to 1016.2 mbs. at end of week.

#### Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1950. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

1951 No. 42

# GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S  
WEEKLY RETURN FOR  
ENGLAND AND WALES

# BIRTHS AND DEATHS, INFECTIOUS DISEASES, WEATHER

WEEK ENDED

SATURDAY, 20th OCTOBER, 1951

*Crown Copyright Reserved.*

LONDON: HIS MAJESTY'S STATIONERY OFFICE

1951

*Ninepence net*

## NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The sickness and incapacity rates shown in Table V are based on the results of sample interviews carried out for the Registrar General by the Social Survey of the Central Office of Information. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table VI) are supplied by the Ministry of National Insurance. Meteorological data (Tables VII and VIII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are included.

4. Births and deaths for Greater London, London and the other Great Towns are those registered in the area and have not been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

## NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available:—

<b>Monthly</b>	Deaths from smallpox—about the fourth week following the month.																			
<b>Quarterly</b>	(a) Numbers and rates of live births, stillbirths, total deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).																			
	(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.																			
<b>Annual</b>	Numbers and rates of live births, stillbirths, total deaths, and deaths of infants under one year of age—about the third week in January. Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.																			

## Acute Poliomyelitis. England and Wales.

Weekly notifications\* of acute poliomyelitis in 1951 compared with those in 1950, 1949, 1948 and 1947.

\* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List\* and at different age periods) registered in the week ended 20th October, 1951, with totals from the first week of the year to date. } London.

\* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

**TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative  
the week ended 20th October, 1951. } Areas and Port Health Districts.**

(See notes on page 2).

*Note:—*Where no return has been received an asterisk \* is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

	Scarlet fever.		Whooping cough.		Diphtheria.		Measles, excluding rubella.		Acute pneumonia (primary or influenzal).		Cholera.		Plague.		Meningococcal infection		Acute polio-myelitis		Acute enceph-alitis		Typhus fever.		Relapsing fever.		Continued fever. (London only).		Dysentery.		Ophthalmia neonatorum.		Puerperal pyrexia and Puerperal fever.		Smallpox.		Paratyphoid fever.		Typhoid fever.		Food poisoning

\* See note 3.

Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.

(2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

(3) The weekly averages are usually for periods of four weeks, but the months are marked \* when the average is for periods of five weeks.

#### Daily Notes

Sunday—Cloudy until mid-evening, becoming fair to fine. Mist most of day; fog in late evening.

Monday—Fine early, then sky obscured by fog until mid-morning; fair to cloudy late. Thick fog 02h.—10.50h.; shallow fog in early evening, thickening later (20h.—24h.).

Tuesday—Fair early, then sky obscured by fog almost all day, except for short fine period in afternoon. Thick fog 00h.—09.30h., 17.15h.—22h.

Wednesday—Sky obscured by fog early, then generally cloudy except for fair period in afternoon. Moderate to light rain in morning, heavy at 07.30h.

Thursday—Cloudy most of day, except for short fair periods around 06h. and before mid-day. Fog and frost in morning.

Friday—Cloudy most of day, becoming fair to fine in evening. Fog and dew in morning; mist and dew in evening.

Saturday—Fine to fair early; cloudy most of day except for fair periods in morning and around 15h. Light shower early afternoon; mist and frost early. Fresh WSW-SW winds:—11.30h.—12.25h., 13.30h.—15.10h.

The reading of the barometer rose from 1016.2 mbs. at beginning of week to 1031.6 mbs. at 00.30h. on 16th, and fell to 1027.7 mbs. at 23.35h. on 16th, then rose to 1030.9 mbs. at 20.50h. on 17th, and fell to 1006.3 mbs. at end of week.

#### Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1950. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

# GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S  
WEEKLY RETURN FOR  
ENGLAND AND WALES

# BIRTHS AND DEATHS, INFECTIOUS DISEASES, WEATHER

WEEK ENDED

SATURDAY, 27th OCTOBER, 1951

*Crown Copyright Reserved.*

LONDON: HIS MAJESTY'S STATIONERY OFFICE

1951

*Ninepence net*

## NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The sickness and incapacity rates shown in Table V are based on the results of sample interviews carried out for the Registrar General by the Social Survey of the Central Office of Information. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table VI) are supplied by the Ministry of National Insurance. Meteorological data (Tables VII and VIII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and the other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

#### Estimates of Births. England and Wales.

(a) Final estimate of live births to be expected in the quarter ending 31st December, 1951	157,000
(b) Provisional estimate of live births to be expected in the quarter ending 31st March, 1952	180,000

In the above estimates regard has been had to (1) sample returns of the number of special ration books issued to expectant mothers by the Ministry of Food, and (2) the recent trend of registered live births. The sample comprises some 200 Food Office areas containing about 25 per cent. of the population.

#### Smallpox. England and Wales.

There were no deaths from smallpox registered during the month of September.

#### Acute Poliomyelitis. England and Wales.

Weekly notifications\* of acute poliomyelitis in 1951 compared with those in 1950, 1949, 1948 and 1947.

Week Ended	Jun 2	Jun 9	Jun 16	Jun 23	Jun 30	Jul 7	Jul 14	Jul 21	Jul 28	Aug 4	Aug 11	Aug 18	Aug 25	Sept 1	Sept 8	Sept 15	Sept 22	Sept 29	Oct 6	Oct 13	Oct 20	Oct 27
Year: 1951	28	52	50	84	86	100	119	132	121	117	111	121	116	89	86	90	85	108	96	94	119	96
1950	37	79	93	142	160	212	212	261	306	367	393	550	589	491	519	479	419	332	353	308	278	253

\* Not corrected for revision of diagnosis.

**TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.**

(a) London.

(b) Great Towns in the aggregate.

(See notes on page 2).

*Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.*

\* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate e.g., influenzal pneumonia.

**TABLE III.—Deaths (classified in accordance with the Abbreviated List\* and at different age periods) registered in the week ended 27th October, 1951, with totals from the first week of the year to date. } London.**

\* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

**TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative  
the week ended 27th October, 1951. } Areas and Port Health Districts.**

(See notes on page 2).

*Note:*—Where no return has been received an asterisk \* is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

\* See note 3.

Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.

(2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

(3) The weekly averages are usually for periods of four weeks, but the months are marked \* when the average is for periods of five weeks.

#### Daily Notes

Sunday—Fair to cloudy early, then fair becoming fine late. Light to moderate showers early morning; with squall at 15.10h. Gusts more than 38 m.p.h.:—15.10h. (SW).

Monday—Fair early, then cloudy until late evening, then fine. Continuous light rain during morning and early afternoon. Gusts more than 38 m.p.h.:—14.50h., 15.55h. (NNW).

Tuesday—Fine all day. Frost in morning; haze in early evening, becoming fog for rest of day.

Wednesday—Fine most of day with fair periods in morning and afternoon. Fog until 11h. and again in evening; thick at 21.30h.—24h. Shallow fog at 16.40h. Frost in morning.

Thursday—Fine most of day except for fair to cloudy period around mid-day and early afternoon. Fog until early afternoon and again in evening; thick at 00h.—09.25h., 20h.—24h.

Friday—Overcast with fog early, thick 00h.—08h.; cloudy rest of day. Fresh ESE wind 17.50h.—18.35h.

Saturday—Cloudy until mid-morning, becoming fair to fine by mid-day. Overcast with fog early evening; cloudy with slight drizzle late.

The reading of the barometer rose from 1006.3 mbs. at beginning of week to 1031.1 mbs. at 10.00h. on 24th, then fell to 1009.4 mbs. at end of week.

#### Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1950. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

## NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The sickness and incapacity rates shown in Table V are based on the results of sample interviews carried out for the Registrar General by the Social Survey of the Central Office of Information. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table VI) are supplied by the Ministry of National Insurance. Meteorological data (Tables VII and VIII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are included.

4. Births and deaths for Greater London, London and the other Great Towns are those registered in the area and have not been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

## NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available :—

**Monthly** Deaths from smallpox—about the fourth week following the month.

**Quarterly** (a) Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

**Annual** Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under one year of age—about the third week in January.  
Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

## Acute Poliomyelitis

Weekly notifications\* of acute poliomyelitis in 1951 compared with those in 1950, 1949, 1948 and 1947.

\* Not corrected for revision of diagnosis.

**TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.**

(a) London.

(b) Great Towns in the aggregate.

(See notes on page 2).

*Note:*—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

\* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate e.g., influenzal pneumonia.

\*\* Return not received.

TABLE III.—Deaths (classified in accordance with the Abbreviated List\* and at different age periods) registered in the week ended 3rd November, 1951, with totals from the first week of the year to date. } London.

(See notes on page 2).

\* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

**TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative  
the week ended 3rd November, 1951. } Areas and Port Health Districts.**

(See notes on page 2).

*Note:*—Where no return has been received an asterisk \* is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

	Scarlet fever.	Whooping cough.	Diphtheria.	Measles, excluding rubella.	Acute pneumonia (primary or influenzal).	A	B	Meningococcal infection D	Paralytic E	Acute polio-myelitis EF	Acute enceph-alitis GK	H	I	J	L	M	N C	O	P	R	S

								London & Middx.	Remainder			
1	2	3	4	5	6	7	8	9	10	11	12	13

(a) New claims to sickness benefit.

Week ended:—												
Oct. 30	126,200	11,000	13,400	22,000	9,800	12,300	6,600	18,100	12,100	5,300	6,900	8,700
Oct. 23	127,600	10,800	13,700	21,900	9,700	12,800	6,600	18,400	12,600	5,400	7,000	8,700
Oct. 16	126,500	11,000	13,300	21,600	9,700	13,000	6,600	18,100	12,100	5,400	6,900	8,800
Oct. 9	123,200	10,500	13,200	21,300	9,600	12,500	6,100	17,300	11,500	5,100	6,900	9,200
Weekly Averages:—												
1951 Sept.	105,100	9,300	11,500	18,800	8,100	10,400	5,300	13,900	9,500	4,300	5,900	8,100
*1950 Sept.	104,700	9,200	11,300	18,700	8,300	10,400	5,400	14,000	9,600	4,300	5,900	7,600

(b) New claims to injury benefit.

Week ended:—												
Oct. 30	14,500	2,200	2,300	1,800	1,600	1,300	600	1,000	1,000	500	600	1,800

\* See note 3.

Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.

(2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

(3) The weekly averages are usually for periods of four weeks, but the months are marked \* when the average is for periods of five weeks.

TABLE VII.—Air Temperature and Rainfall in  
the week ended 3rd November, 1951.

Certain Great Towns in England and  
Wales and four Scottish and Irish Towns.

#### Daily Notes

Sunday—Cloudy early and for period around 09h., and again in evening, otherwise fair. Intermittent light drizzle late afternoon; light to moderate showers in evening.

Monday—Cloudy most of day except for fair period at 09h. Light showers and intermittent light rain morning and afternoon; heavy shower 12.10h., light rain late afternoon and evening; moderate for short period.

Tuesday—Mainly cloudy. Dew in morning, and mist in late afternoon and evening.

Wednesday—Cloudy, becoming fair to fine in evening. Continuous light to moderate rain in morning, heavy at times. Heavy shower with squall and thunder 12.20h. Light shower in afternoon followed by rain, heavy at times.

Thursday—Fine early and late, otherwise fair most of day, except for cloudy periods around 06h. and at mid-day. Fog late afternoon and early evening.

Friday—Cloudy, becoming fair to fine in afternoon and evening. Light to moderate rain morning and afternoon; heavy 06.50—55h. and at times around mid-day; squall 11.40h. Slight hail shower 15.45h. Mist early and in evening.

Saturday—Fine in morning, becoming cloudy by mid-day; fair in afternoon and fine in evening. Frost in morning mist and dew in evening.

The reading of the barometer rose from 1009.4 mbs. at beginning of week to 1015.2 mbs. at 18.40h. on 30th, fell to 1005.0 mbs. at 13.20h. on 31st, rose to 1016.1 mbs. at 10.30h. on 1st and then fell to 1000.9 mbs. by end of week.

#### Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ending 1950. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

1951 No. 45

# GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S  
WEEKLY RETURN FOR  
ENGLAND AND WALES

# BIRTHS AND DEATHS, INFECTIOUS DISEASES, WEATHER

WEEK ENDED

SATURDAY, 10th NOVEMBER, 1951

*Crown Copyright Reserved.*

LONDON: HIS MAJESTY'S STATIONERY OFFICE

1951

*Ninepence net*

## NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The sickness and incapacity rates shown in Table V are based on the results of sample interviews carried out for the Registrar General by the Social Survey of the Central Office of Information. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table VI) are supplied by the Ministry of National Insurance. Meteorological data (Tables VII and VIII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are included.

4. Births and deaths for Greater London, London and the other Great Towns are those registered in the area and have not been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

## NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available:—

<b>Monthly</b>	Deaths from smallpox—about the fourth week following the month.
<b>Quarterly</b>	(a) Numbers and rates of live births, stillbirths, total deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return). (b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.
<b>Annual</b>	Numbers and rates of live births, stillbirths, total deaths, and deaths of infants under one year of age—about the third week in January. Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

## Acute Poliomyelitis

Weekly notifications\* of acute poliomyelitis in 1951 compared with those in 1950, 1949, 1948 and 1947.

Week Ended	Jun 30	Jul 7	Jul 14	Jul 21	Jul 28	Aug 4	Aug 11	Aug 18	Aug 25	Sept 1	Sept 8	Sept 15	Sept 22	Sept 29	Oct 6	Oct 13	Oct 20	Oct 27	Nov 3	Nov 10	Nov 17	Nov 24

\* Not corrected for revision of diagnosis.

**TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.**

(a) London.

(b) Great Towns in the aggregate.

(See notes on page 2).

*Note*:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

\* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List\* and at different age periods) registered in the week ended 10th November, 1951, with totals from the first week of the year to date. } London.

(See notes on page 2).

\* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

**TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative  
the week ended 10th November, 1951. } Areas and Port Health Districts.**

(See notes on page 2).

*Note:*—Where no return has been received an asterisk \* is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

	Scarlet fever.	Whooping cough.	Diphtheria.	Measles, excluding rubella.	Acute pneumonia (primary or influenzal).	Cholera.	Plague.	Meningococcal infection	Paralytic	Non-paralytic	Acute polio-EF myelitis	Infective	Post Infectious	Acute enceph-GK alitis	Typhus fever.	Relapsing fever.	Continued fever. (London only).	Dysentery.	Ophthalmia neonatorum.	Puerperal pyrexia and Puerperal fever.	Smallpox.	Paratyphoid fever.	Typhoid fever.	Food poisoning

\* See note 3.

Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.

(2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

(3) The weekly averages are usually for periods of four weeks, but the months are marked \* when the average is for periods of five weeks.

Daily Notes

Sunday—Cloudy. Continuous light to moderate rain morning and afternoon; heavy 12.10—40h. Intermittent light rain in evening. Fresh SSE—SE winds 10.30h.—24h.

Monday—Cloudy. Continuous light to moderate rain almost all day; heavy 03.20—30h. and at times in afternoon and evening. Fog in evening; fresh SE winds 00.00h.—08.20h.

Tuesday—Cloudy most of day, but becoming fair to fine in evening; short fair periods during morning. Continuous light to moderate rain early; heavy 04.25h., 04.30—35h. Solar halo early afternoon. Dew in evening.

Wednesday—Fair early, and in afternoon, otherwise cloudy, except for fine period in early evening. Continuous light to moderate rain in morning, heavy at times; intermittent drizzle 06h. Shallow fog early evening and dew. Light shower late.

Thursday—Cloudy. Continuous light to moderate rain morning and afternoon; heavy at times. Intermittent drizzle late afternoon and evening. Fog in morning and late afternoon.

Friday—Cloudy. Intermittent slight rain in afternoon; continuous in early evening. Light to moderate, heavy at times, around 19h., then slight intermittent drizzle. Continuous light to moderate late, heavy 23.20—45h.

Saturday—Cloudy early; fine to fair in morning, then cloudy. Continuous light rain early; moderate to heavy late afternoon and evening, becoming slight late. Fog around 06h. Fresh ENE winds 18h., 18.40h., 19.35h., 19.50h., 20.20h.

The reading of the barometer fell from 1000.9 mbs. at beginning of week to 990.4 mbs. at 14.15h. on 4th, rose to 999.4 mbs. at 20.50h. on 6th, fell to 982.5 mbs. at 17.00h. on 8th, rose to 995.4 mbs. at 11.35h. on 10th, and then fell to 990.3 mbs. by end of week.

Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1950. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

1951 No. 46

# GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S  
WEEKLY RETURN FOR  
ENGLAND AND WALES

# BIRTHS AND DEATHS, INFECTIOUS DISEASES, WEATHER

WEEK ENDED

SATURDAY, 17th NOVEMBER, 1951

*Crown Copyright Reserved.*

LONDON: HIS MAJESTY'S STATIONERY OFFICE

1951

*Ninepence net*

## NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The sickness and incapacity rates shown in Table V are based on the results of sample interviews carried out for the Registrar General by the Social Survey of the Central Office of Information. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table VI) are supplied by the Ministry of National Insurance. Meteorological data (Tables VII and VIII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and the other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

## NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available:—

<b>Monthly</b>	Deaths from smallpox—about the fourth week following the month.
<b>Quarterly</b>	(a) Numbers and rates of live births, stillbirths, <i>total</i> deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics <i>see</i> the Registrar General's Quarterly Return). (b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.
<b>Annual</b>	Numbers and rates of live births, stillbirths, <i>total</i> deaths, and deaths of infants under one year of age—about the third week in January. Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

## Acute Poliomyelitis

Weekly notifications\* of acute poliomyelitis in 1951 compared with those in 1950, 1949, 1948 and 1947.

\* Not corrected for revision of diagnosis.

**TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.**

(a) London.

(b) Great Towns in the aggregate.

(See notes on page 2).

*Note*.—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

\* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate e.g., influenzal pneumonia.

**TABLE III.—Deaths (classified in accordance with the Abbreviated List\* and at different age periods) registered in the week ended 17th November, 1951, with totals from the first week of the year to date.** } London.

\* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

TABLE IV.—Notification of Infectious Diseases in }  
the week ended 17th November, 1951.

England and Wales, Administrative  
Areas and Port Health Districts.

(See notes on page 2).

Note:—Where no return has been received an asterisk \* is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

Notes: (1) Broadly, the whole of the civilian working population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.

(2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

(3) The weekly averages are usually for periods of four weeks, but the months are marked \* when the average is for periods of five weeks.

#### Daily Notes

Sunday—Mainly cloudy except for fair period in early afternoon. Moderate shower early; light shower in evening.

Monday—Cloudy most of day except for fair period around 06h. Light to moderate rain around 09h.; intermittent slight and moderate shower at mid-day. Continuous moderate in afternoon; heavy 14h., 14.10h., then light. Mist in evening.

Tuesday—Cloudy all day; dew early evening.

Wednesday—Cloudy until mid-morning, becoming fair, then fine at mid-day for rest of day. Fog late afternoon and early evening, with some shallow fog; thick 20.45h.—21.30h. Dew morning and evening.

Thursday—Fair early, cloudy morning and afternoon; fine to fair in evening. Light to moderate rain in morning heavy 09.50h.—10h., 10.40h. Slight showers in afternoon. Fresh S—SW winds 03.20h.—14.30h. Dew in evening.

Friday—Fair early and late; otherwise cloudy. Light rain and drizzle and light shower in morning. Continuous light to moderate rain late afternoon; moderate to heavy in evening. Fresh SSW—SW winds 09.45h.—24h.

Saturday—Cloudy. Continuous moderate to heavy rain most of morning and periods in afternoon. Showers in evening heavy 18.30h., 20h.—20.20h. Gust more than 38 m.p.h.:—09.10h. (SW'S).

The reading of the barometer rose from 990.3 mbs. at beginning of week to 997.3 mbs. at 18h. on 11th fell to 995.3 mbs. at 13h. on 12th, rose to 1013.6 mbs. at 19.10h. on 14th, and then fell to 993.0 mbs. at end of week.

#### Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1950. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

*Ninepence net*

## NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The sickness and incapacity rates shown in Table V are based on the results of sample interviews carried out for the Registrar General by the Social Survey of the Central Office of Information. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table VI) are supplied by the Ministry of National Insurance. Meteorological data (Tables VII and VIII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and the other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

## NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available :—

<b>Monthly</b>	Deaths from smallpox—about the fourth week following the month.																			
<b>Quarterly</b>	(a) Numbers and rates of live births, stillbirths, <i>total</i> deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics <i>see</i> the Registrar General's Quarterly Return).																			
	(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.																			
<b>Annual</b>	Numbers and rates of live births, stillbirths, <i>total</i> deaths, and deaths of infants under one year of age—about the third week in January. Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.																			

## Acute Poliomyelitis

Weekly notifications\* of acute poliomyelitis in 1951 compared with those in 1950, 1949, 1948 and 1947.

**TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.**

(a) London.

(b) Great Towns in the aggregate.

(See notes on page 2).

*Note:—*The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

\* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate e.g., influenzal pneumonia.

**TABLE III.—Deaths (classified in accordance with the Abbreviated List\* and at different age periods) registered in the week ended 24th November, 1951, with totals from the first week of the year to date.** } London.

\* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

**TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative  
the week ended 24th November, 1951. } Areas and Port Health Districts.**

(See notes on page 2).

*Note:—*Where no return has been received an asterisk \* is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

	Scarlet fever.	Whooping cough.	Diphtheria.	Measles, excluding rubella.	Acute pneumonia (primary or influenzal).	Cholera. (b) New claims to injury benefit.												
Week ended:—												
Nov. 20	14,300	2,100	2,300	1,800	1,500	1,300	600	1,100	900	500	600	1,800

Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.

(2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

(3) The weekly averages are usually for periods of four weeks, but the months are marked \* when the average is for periods of five weeks.

TABLE VII.—Air Temperature and Rainfall in  
the week ended 24th November, 1951.

#### Daily Notes

**Sunday**—Cloudy, becoming fine late. Light to moderate rain, heavy at times, continuous from morning until mid-evening. Heavy shower late. Fresh S winds 0.0h.—10h., 11.45h.—12.10h.

**Monday**—Fair at first, then mainly cloudy, becoming fair to fine late. Continuous light to moderate rain in morning; heavy at times; light to moderate showers morning and afternoon; heavy 09h. Dew in evening.

**Tuesday**—Fine to fair in morning and early afternoon, then generally cloudy. Light to moderate showers afternoon and evening, heavy 21.15h. Gusts more than 38 m.p.h.:—18.35h., 18.40h., 20.45h. (SSW). Dew in morning.

**Wednesday**—Cloudy early, and for period in afternoon; otherwise fair. Moderate shower early; light shower in afternoon. Fresh winds:—0.0h.—00.20h. (SW), 04.20—45h., 06.50h. (WSW), 07.15h.—11.30h. (SW—W), 13.50h.—14.10h. (WNW), 15.40h.—16.10h. (WNW—NW).

**Thursday**—Fair early, at mid-day and for period in afternoon; otherwise cloudy. Light showers in morning; light to moderate rain late.

**Friday**—Cloudy. Continuous light to moderate rain early; light drizzle in morning. Light drizzle late afternoon and evening, with light to moderate rain. Fog in morning, until mid-day, and in evening.

**Saturday**—Cloudy. Intermittent slight drizzle in morning. Continuous light to moderate rain late afternoon to evening; heavy at times. Gusts more than 38 m.p.h.:—10.35h.—18.10h. (SW).

The reading of the barometer fell from 993.0 mbs. at beginning of week to 983.3 mbs. at 12.10h. on 18th, rose to 999.5 mbs. at 09.50h. on 20th, fell to 986.4 mbs. at 06h. on 21st, rose to 1007.3 mbs. at 18.25h. on 22nd, fell to 994.6 mbs. at 21.40h. on 24th, and then rose to 996.8 mbs. by end of week.

#### Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1950. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

## NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The sickness and incapacity rates shown in Table V are based on the results of sample interviews carried out for the Registrar General by the Social Survey of the Central Office of Information. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table VI) are supplied by the Ministry of National Insurance. Meteorological data (Tables VII and VIII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are included.

4. Births and deaths for Greater London, London and the other Great Towns are those registered in the area and have not been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

## NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available :—

**Monthly** Deaths from smallpox—about the fourth week following the month.

**Quarterly** (a) Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

**Annual** Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under one year of age—about the third week in January.  
Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

## Smallpox

There were no deaths from smallpox registered during the month of October.

## Acute Poliomyelitis

Weekly notifications\* of acute poliomyelitis in 1951 compared with those in 1950, 1949, 1948 and 1947.

Week Ended	Aug 4	Aug 11	Aug 18	Aug 25	Sept 1	Sept 8	Sept 15	Sept 22	Sept 29	Oct 6	Oct 13	Oct 20	Oct 27	Nov 3	Nov 10	Nov 17	Nov 24	Dec 1	Dec 8	Dec 15	Dec 22	Dec 29

\* Not corrected for revision of diagnosis.

**TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.**

(a) London.

(b) Great Towns in the aggregate.

(See notes on page 2).

*Note:—*The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

\* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abbreviated List\* and at different age periods) registered in the week ended 1st December, 1951, with totals from the first week of the year to date. } London.

(See notes on page 2).

\* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

TABLE IV.—Notification of Infectious Diseases in  
the week ended 1st December, 1951.

England and Wales, Administrative  
Areas and Port Health Districts.

(See notes on page 2).

Note:—Where no return has been received an asterisk \* is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

**(b) New claims to injury benefit.**

Week ended:—												
Nov. 27	13,800	2,000	2,200	1,800	1,500	1,300	500	1,000	900	400	600	1,600

Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.

(2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

(3) The weekly averages are usually for periods of four weeks, but the months are marked \* when the average is for periods of five weeks.

TABLE VII.—Air Temperature and Rainfall in  
the week ended 1st December, 1951.

Certain Great Towns in England and  
Wales and four Scottish and Irish Towns.

#### Daily Notes

Sunday—Cloudy early, and for period in morning. Light rain early; moderate showers morning and at mid-day. Fresh winds:—00.20—30h. (W), 05.45h.—06h. (W), 12.50h.—13.50h. (NNW—N).

Monday—Fair early, then fine. Frost in morning, haze and shallow fog late afternoon, and mist in evening.

Tuesday—Fair early, becoming cloudy in early morning for rest of day. Fresh SW winds 11h.—11.50h., 12.15h.—13.40—50h., 14.20h.

Wednesday—Fair early, becoming fine; fair to cloudy by 09h. until mid-evening, then fair to fine late. Light showers in evening. Gusts more than 38 m.p.h.:—18.45h. (WNW), 18.55h. (NW), 19h. (NW).

Thursday—Fine in early morning, becoming cloudy until mid-evening, then fair to fine. Intermittent light rain and drizzle in morning; continuous light rain for short period. Frost in morning.

Friday—Fair at first, becoming cloudy; fair to fine until mid-afternoon, then cloudy until end of day. Fresh winds 17h.—17.10h. (W), 18h.—18.35h. (W—WSW), 21.20—40h., 23.40—55h. (WSW). Dew in morning.

Saturday—Cloudy until about 11h., then fair to fine. Fog late afternoon and evening. Dew and frost in evening.

The reading of the barometer rose from 996.8 mbs. at beginning of week to 1036.3 mbs. at 22.00h. on 26th, fell to 624.9 mbs. at 17.00h. on 28th, rose to 1033.8 mbs. at 06.00h. on 29th, fell to 1021.8 mbs. at end of week.

#### Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ending 1950. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

1951 No. 49

# GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S  
WEEKLY RETURN FOR  
ENGLAND AND WALES

# BIRTHS AND DEATHS, INFECTIOUS DISEASES, WEATHER

WEEK ENDED

SATURDAY, 8th DECEMBER, 1951

## NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The sickness and incapacity rates shown in Table V are based on the results of sample interviews carried out for the Registrar General by the Social Survey of the Central Office of Information. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table VI) are supplied by the Ministry of National Insurance. Meteorological data (Tables VII and VIII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are included.

4. Births and deaths for Greater London, London and the other Great Towns are those registered in the area and have not been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

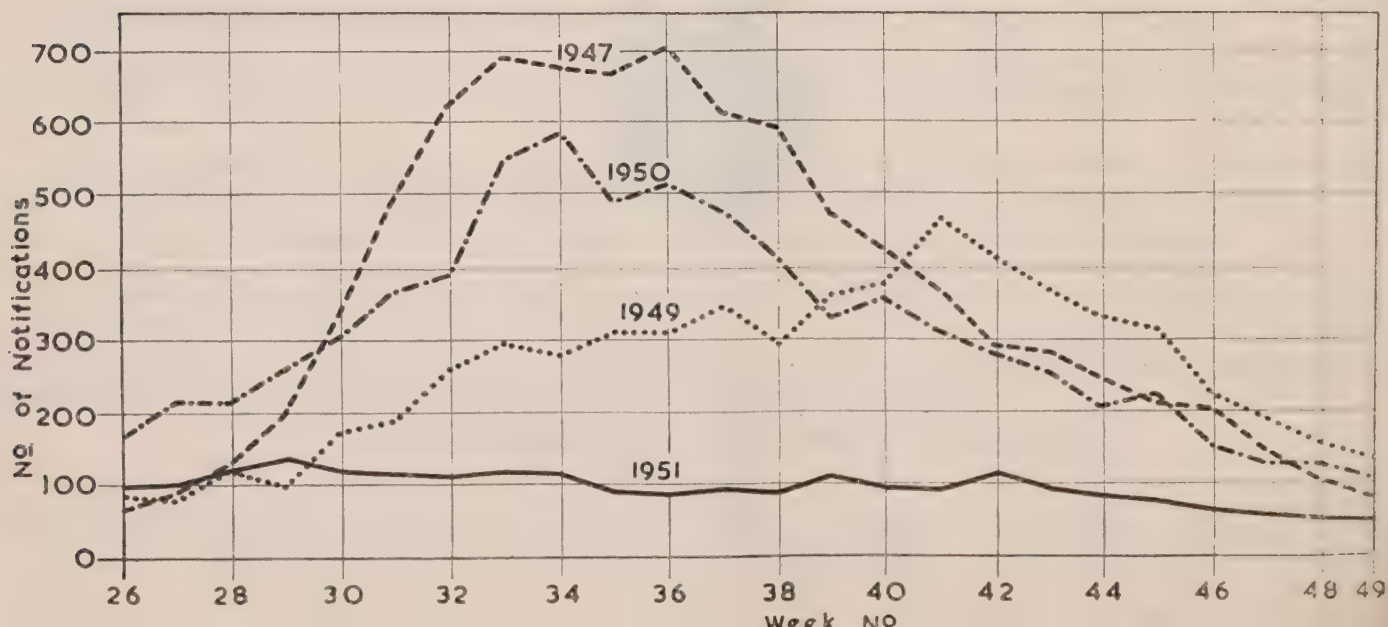

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

## Acute Poliomyelitis. England and Wales.

Weekly notifications\* of acute poliomyelitis in 1951 compared with those in 1950, 1949, 1948 and 1947.

\* Not corrected for revision of diagnosis.

**TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.**

(a) London.

(b) Great Towns in the aggregate.

(See notes on page 2).

*Note:*—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

\* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate e.g., influenzal pneumonia.

**TABLE III.—Deaths (classified in accordance with the Abbreviated List\* and at different age periods) registered in the week ended 8th December, 1951, with totals from the first week of the year to date.** } London.

(See notes on page 2).

\* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative  
the week ended 8th December, 1951. } Areas and Port Health Districts.

(See notes on page 2).

Note:—Where no return has been received an asterisk \* is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the “Others” column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

		Northern	East and West Ridings	North Western	North Midland	Midland	Eastern	London and South Eastern		Southern	South Western	Wales
								London & Middx.	Remainder			
1	2	3	4	5	6	7	8	9	10	11	12	13
(a) New claims to sickness benefit.												
Week ended:—												
Dec. 4	102,300	9,300	10,700	18,600	8,000	10,000	5,500	13,400	9,400	4,600	5,600	7,300
Nov. 27	104,700	9,300	11,100	19,000	8,100	10,200	5,500	13,900	9,700	4,600	6,000	7,500
Nov. 20	110,300	9,700	11,500	19,500	8,600	10,800	6,000	15,100	10,200	4,800	6,200	7,900
Nov. 13	122,500	10,800	12,800	21,300	9,600	11,800	6,500	17,000	11,700	5,400	6,800	8,800
Weekly Averages:—												
1951 Nov.	115,500	10,200	12,100	20,400	9,000	11,200	6,100	15,900	11,000	5,100	6,500	8,100
1950 Nov.	129,300	11,400	13,400	24,100	9,900	12,700	6,600	17,500	12,000	5,300	7,400	9,000
(b) New claims to injury benefit.												
Week ended:—												
Dec. 4	13,500	2,000	2,100	1,700	1,500	1,300	500	1,000	900	500	600	1,560

Notes: (1) Broadly, the whole of the civilian working population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.

(2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

(3) The weekly averages are usually for periods of four weeks, but the months are marked \* when the average is for periods of five weeks.

#### Daily Notes

Sunday—Fine to fair until late evening, then cloudy. Frost until mid-morning; mist until mid-day.

Monday—Cloudy early, becoming fair to fine; cloudy by mid-day for rest of day. Continuous light rain early afternoon; heavy 15.15h.; moderate to light until early evening; slight rain late. Fog in morning.

Tuesday—Cloudy all day. Light rain early; intermittent light rain in afternoon. Fresh W—WSW winds:—09.20h. 11.45h., 12.20—35h., 13.05—15h., 14h.—23.40h.

Wednesday—Cloudy all day. Continuous light drizzle late. Fresh WSW—SW winds 00h.—07.25h., 08.20h.—23.40h. Gusts more than 38 m.p.h.:—10.30h., 12.20h., 14.55h., 15.05h. (WSW).

Thursday—Cloudy until mid-morning, becoming fair, then fine by mid-day for rest of day. Continuous light drizzle and light to moderate rain early morning; heavy 01h.—01.10h., 01.20h. Fog and frost in evening.

Friday—Fine early, fair to cloudy by 06h., then fine by 09h. Fair morning and afternoon, cloudy in evening. Intermittent light rain early. Fog and mist until mid-day; mist and dew in evening. Fresh SW winds 22h.—24h.

Saturday—Cloudy, becoming fair to fine late evening. Light to moderate rain early, heavy 06.35h., intermittent morning; continuous moderate in afternoon; heavy 14.40h., 16.25—35h., continuous light to moderate in evening. Fresh strong SW—WSW winds most of day. Gusts more than 38 m.p.h.:—11h.—18h.

The reading of the barometer fell from 1021.8 mbs. at beginning of week to 1019.6 mbs. at 14.00h. on 2nd, rose to 1024.0 mbs. at 08.15h. on 3rd, fell to 1009.6 mbs. at 14.00h. on 6th, rose to 1016.4 mbs. at 10.30h. on 7th, and fell to 999.6 mbs. at end of week.

#### Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1950. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

*Crown Copyright Reserved.*

LONDON: HIS MAJESTY'S STATIONERY OFFICE

1951

*Ninepence net*

## NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The sickness and incapacity rates shown in Table V are based on the results of sample interviews carried out for the Registrar General by the Social Survey of the Central Office of Information. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table VI) are supplied by the Ministry of National Insurance. Meteorological data (Tables VII and VIII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are included.

4. Births and deaths for Greater London, London and the other Great Towns are those registered in the area and have not been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

---

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available :—

<b>Monthly</b>	Deaths from smallpox—about the fourth week following the month.
<b>Quarterly</b>	(a) Numbers and rates of live births, stillbirths, <i>total</i> deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).
	(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.
<b>Annual</b>	Numbers and rates of live births, stillbirths, <i>total</i> deaths, and deaths of infants under one year of age—about the third week in January. Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

**TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.**

(a) London.

(b) Great Towns in the aggregate.

(See notes on page 2).

*Note:—*The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

\* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate e.g., influenzal pneumonia.

\*\* Return not received.

TABLE III.—Deaths (classified in accordance with the Abbreviated List\* and at different age periods) registered in the week ended 15th December, 1951, with totals from the first week of the year to date. } London.

(See notes on page 2).

\* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

TABLE IV.—Notification of Infectious Diseases in  
the week ended 15th December, 1951.

England and Wales, Administrative  
Areas and Port Health Districts.

(See notes on page 2).

Note:—Where no return has been received an asterisk \* is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

	Scarlet fever.		Whooping cough.		Diphtheria.		Measles, excluding rubella.		Acute pneumonia (primary or influenzal).		A Cholera.		B Plague. **(b) New claims to injury benefit.**

Week ended:—												
Dec. 11	12,500	1,800	1,900	1,600	1,300	1,100	500	1,000	900	500	600	1,400

Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.

(2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

(3) The weekly averages are usually for periods of four weeks, but the months are marked \* when the average is for periods of five weeks.

TABLE VII.—Air Temperature and Rainfall in  
the week ended 15th December, 1951.

Certain Great Towns in England and  
Wales and four Scottish and Irish Towns.

#### Daily Notes

Sunday—Fair early, becoming fine then fair from mid-day to end of day. Light shower during morning and afternoon. Fresh to strong WSW—W winds 11.10h.—17.45h. Gusts more than 38 m.p.h.: 09.45h., 11.50h., 12.22.13.05h., 13.35h., 14.10h.—15.05h., 15.55h., 16.05h., 17.30—40h.

Monday—Fair early, becoming fine by 06h., fair to cloudy in morning; cloudy to fair afternoon and early evening then fine late. Light shower early. Dew in morning; mist and fog in evening.

Tuesday—Fine early, becoming cloudy by 06h., then fine all day, except for fair period around 15h. Fog and frost day.

Wednesday—Fair early, then cloudy rest of day. Fog and frost in morning, and again in evening; thick fog 10.19h., 20h.—24h.

Thursday—Cloudy early, becoming fair to fine until mid-morning, then overcast with fog all day, except for fair period in afternoon. Frost morning and evening; thick fog 14.45h.—24h.

Friday—Overcast with fog until mid-morning, then fair to cloudy, becoming fine in early evening; overcast with fog in evening. Fog until late evening, then misty, thick 00h.—11h., and 16.10h.—23h. Frost early, dew in evening.

Saturday—Fair at first, becoming cloudy after 06h. and remaining so until end of day.

The reading of the barometer rose from 995.4 mbs. at beginning of week to 1032.9 mbs. at 22.15h. on 11th, fell to 1020.7 mbs. at end of week.

#### Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1950. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

## NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The sickness and incapacity rates shown in Table V are based on the results of sample interviews carried out for the Registrar General by the Social Survey of the Central Office of Information. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table VI) are supplied by the Ministry of National Insurance. Meteorological data (Tables VII and VIII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. Definition of areas.—“London”=administrative county of London; “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; “C.B.”=county borough; “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and the other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

---

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available :—

- |                  |  |
|------------------|--|
| <b>Monthly</b>   | Deaths from smallpox—about the fourth week following the month.  |
| <b>Quarterly</b> | <p>(a) Numbers and rates of live births, stillbirths, <i>total</i> deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics <i>see</i> the Registrar General's Quarterly Return).</p> <p>(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.</p> |
| <b>Annual</b>    | <p>Numbers and rates of live births, stillbirths, <i>total</i> deaths, and deaths of infants under one year of age—about the third week in January.</p> <p>Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.</p>   |

**TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.**

(a) London.

(b) Great Towns in the aggregate.

(See notes on page 2).

*Note:—*The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

\* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate e.g., influenzal pneumonia.

\*\* Return not received.

TABLE III.—Deaths (classified in accordance with the Abbreviated List\* and at different age periods) registered in the week ended 22nd December, 1951, with totals from the first week of the year to date. } London.

\* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative  
the week ended 22nd December, 1951. } Areas and Port Health Districts.

(See notes on page 2).

Note:—Where no return has been received an asterisk \* is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.

(2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

(3) The weekly averages are usually for periods of four weeks, but the months are marked \* when the average is for periods of five weeks.

Daily Notes

Sunday—Cloudy all day. Dew in morning.

Monday—Cloudy most of day, except for a period in afternoon, when fine. Fog in afternoon, shallow for a time late afternoon. Mist in early evening. Dew forming in afternoon.

Tuesday—Cloudy all day. Light to moderate rain late. Dew morning and evening.

Wednesday—Cloudy most of day, becoming fair to fine in evening. Light to moderate rain early. Fresh winds 11.20h. 12.55h. (S), 13.30—40h. (SSW), 22.20—30h. (S). Dew in evening.

Thursday—Cloudy. Intermittent light rain and drizzle in morning, afternoon and late evening. Light to moderate rain late afternoon and early evening, heavy 17.25—35h. Fog in late afternoon and evening. Dew early.

Friday—Cloudy; sky overcast with fog around 09h. Intermittent light drizzle early. Fog morning and evening, thin 10.15h.—12h. Dew in evening.

Saturday—Cloudy, then overcast from mid-morning until end of day. Intermittent light rain late evening. Mist morning until end of day.

The reading of the barometer rose from 1020.7 mbs. at beginning of week to 1023.6 mbs. at 10h. on 17th, fell to 1011.7 mbs. at 01.40h. on 20th, rose to 1031.6 mbs. at 11h. on 21st, and fell to 1023.7 mbs. at end of week.

Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1950. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.

GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S  
WEEKLY RETURN FOR  
ENGLAND AND WALES

BIRTHS AND DEATHS,  
INFECTIOUS DISEASES,  
WEATHER

WEEK ENDED

SATURDAY, 29th DECEMBER, 1951

*Crown Copyright Reserved.*

LONDON: HIS MAJESTY'S STATIONERY OFFICE

1951

*Ninepence net*

## NOTES

1. **General.**—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of Births and Deaths and Medical Officers of Health respectively. The sickness and incapacity rates shown in Table V are based on the results of sample interviews carried out for the Registrar General by the Social Survey of the Central Office of Information. The figures of new claims to sickness benefit made under the National Insurance Act and injury benefit under the National Insurance (Industrial Injuries) Act (shown in Table VI) are supplied by the Ministry of National Insurance. Meteorological data (Tables VII and VIII) are supplied by the Director of the Meteorological Office. Many of the tables are prepared and published by virtue of the Registrar General's express powers to make arrangements with other Government Departments and Local Authorities in fulfilment of his statutory duty to collect and publish from time to time statistical information with respect to the number and condition of the people and otherwise to further the supply and provide for the better co-ordination of such information.

2. **Definition of areas.**—"London"=administrative county of London; "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough; "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are *included*.

4. Births and deaths for Greater London, London and the other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

---

**Smallpox**

There were no deaths from smallpox registered during the month of November.

---

## NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available :—

**Monthly** . . . . . Deaths from smallpox—about the fourth week following the month.

**Quarterly** (a) Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

**Annual** Numbers and rates of live births, stillbirths, *total* deaths, and deaths of infants under one year of age—about the third week in January.  
Death rates from Tuberculosis and Cancer, Maternal Mortality and also Neo-natal Mortality—about the end of April.

**TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.**

(a) London.

(b) Great Towns in the aggregate.

(See notes on page 2).

*Note:—*The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g., in hospitals) of cases which were notified in areas outside the Great Towns.

\* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate e.g., influenzal pneumonia.

**TABLE III.—Deaths (classified in accordance with the Abbreviated List\* and at different age periods) registered in the week ended 29th December, 1951, with totals from the first week of the year to date.** } London.

\* The Abbreviated List numbers are those set out on pages 361-2 of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948. The further breakdown indicated by small letters after the numbers is one used in the General Register Office; the corresponding numbers in the full List are shown in brackets after the description of the causes.

**TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative  
the week ended 29th December, 1951. } Areas and Port Health Districts.**

(See notes on page 2).

*Note:—*Where no return has been received an asterisk \* is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

Week ended:—												
Dec. 18	12,600	1,900	2,000	1,500	1,400	1,100	500	900	800	400	500	1,000

Notes: (1) Broadly, the whole of the civilian *working* population aged 15 and over can now qualify under the National Insurance Act for sickness benefit without limit of income, including not only those employed under contract of service but also the self-employed. Only comparatively small sections of the working population are excluded, the most numerous being those employed married women who elect not to be insured in their own right.

(2) The National Insurance (Industrial Injuries) Act applies, broadly speaking, to all civilians working for an employer under contract of service or apprenticeship, corresponding closely with the class of "employed persons" under the main scheme.

(3) The weekly averages are usually for periods of four weeks, but the months are marked \* when the average is for periods of five weeks.

#### Daily Notes

Sunday—Overcast until mid-day, except for fine period at 09h., then cloudy. Intermittent light rain in evening. Morning and afternoon; fog in morning until early afternoon. Fresh SSW winds 17h.—17.15h., 20.25—45h., 21.30h.—22.00h.

Monday—Cloudy. Intermittent to continuous light to moderate rain and drizzle practically all day; heavy 06.40—16.40h. Gusts more than 38 m.p.h.:—08.45h.—10.20, 35h., 11.30h.—13.10, 30, 50h., 14.05, 40h., 14.50h.—15h., 15.20h.—17.10h., 20.45, 21h. (SSW)

Tuesday—Cloudy most of day except for short fair periods in morning and afternoon; fair to fine late. Intermittent light rain in morning; fog late afternoon and early evening. Fresh SW—WSW winds 00h.—02h.

Wednesday—Fair to fine until evening, except for cloudy period at 09h.; cloudy by 21h. Mist and frost in morning; fog late afternoon becoming mist; frost forming but melting by 21h.

Thursday—Generally cloudy until early evening, except for fair period at 09h.; fine in evening. Light to moderate rain early; heavy 06.05—15h. Gusts more than 38 m.p.h.:—02.35h., 03h.—03.35h., 03.50h.—04.05h. 05.25h.—06.15h., 21h. (S—SW)

Friday—Fine to fair in morning except for cloudy period at 06h.; cloudy in afternoon and evening with continuous light to moderate rain, heavy at 18.25—40h., 18.50h.—19.10h. Gusts more than 38 m.p.h.:—01.55h., 02.15h. (SW).

Saturday—Cloudy early with light to moderate rain becoming intermittent during morning; fair by late afternoon and fine late. Fresh N—NW winds 06.45h.—15.50h. Frost in evening.

The reading of the barometer fell from 1023.7 mbs. at beginning of week to 988.5 mbs. at 21.15h. on 24th, rose to 1008.4 mbs. at 18.50h. on 26th, fell to 982.9 mbs. at 22.00h. on 28th, and then rose to 1016.1 mbs. at end of week.

#### Explanatory Notes

The results apply to the civil day, i.e. from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 34 feet above the mean level of the sea.

Observations are taken at 6h. and 9h. A.M., noon, 3h, 6h. and 9h. P.M. The readings of the barometer shown in column 3 (in millibars) and of the air temperature shown in column 6 (in degrees Fahrenheit), are the means of 24 hourly values derived from photographic records.

The average temperature of the air is that derived from an analysis of the observations made at Kew during the 80 years ended 1950. In reading column 7 it should be borne in mind that + indicates "higher" and — "lower" than the average.

The measure of humidity now shown in column 8 is the partial pressure of water vapour (in millibars).

The numbers in column 10, derived from the Campbell Stokes Sunshine Instrument, show the aggregate duration of bright sunshine on each day.

The degree of atmospheric pollution, as measured by the Owen's Smoke Filter, is shown by the maximum, minimum and mean readings for each day (in milligrammes per cubic metre) in columns 12, 13 and 14.
